CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

With so much land in NM available, and so much residential building going on, these facilities are going to end up in the middle of residential neighborhoods. I live at 7028 Vuelta Vistoso which is near the corner of Jaguar and Paseo del Sol West, in the Tierra Contenta neighborhood. Many afternoons and evenings we have to go inside because the odor from the wastewater treatment facility is overwhelming enough to make you gag. Now you want to add Asphalt smells to it? Certainly Santa Fe can do better for their citizens.

To: The Environmental Improvement Board Administrator, New Mexico Environment Department

It is surprising and disappointing that you would even consider approving the 24/7 365 days a year operation of the consolidated hot mix asphalt plant permit as proposed by Associated Asphalt & Materials. The pollution created by these operations would spew toxic particulate matter in the air, gravely affecting the surrounding residential neighborhoods and in effect all of Santa Fe. That you would not allow commentary on environmental concerns by immediate neighbors nor have an interpreter for Spanish speakers at your last hearing raises serious questions as to the process and suggests that there was an inherent bias.

We do not believe that the permit for Associated Asphalt & Materials would be in the public and community's best interest and hope that you will vote against it.

Thank you for taking our comments,

Susan and Roger Peirce

Monday, February 21, 2022

Dear Environmental Improvement Board,

This is my third set of comments for the upcoming EIB hearing on February 23. I reserve the right to make oral comments at the hearing, as well, as does my husband, Franz Vote. Franz is also a signatory to these comments, as well as the previous 2 sets of written comments that we already submitted.

The subject of this email is NMED's Motion to prevent the Community from offering testimony regarding cumulative impacts of pollution and Environmental Racism/Justice. There are two principal reasons why our family is concerned about NMED's Motion:

1. Environmental Justice and cumulative impacts of pollution from all sources located in the industrial commercial zone west of Route 599, running north and south of Airport Road, are among the most important reasons for denying an Air Quality Permit to AAM. We believe it is high time for NMED and other government agencies to begin taking these factors into account when approving or denying permits for activities that have major impacts on public health.

2. This is the second time that the Community perceives an effort on the part of NMED to strong-arm the Environmental Improvement Board (EIB) into doing its bidding: The first instance was when Community and an attorney, Christopher Vigil, representing the New Mexico Environmental Law Center, met online with the EIB to request an appeal hearing. At that time, Mr. Vigil initially tried to prevent a hearing before the EIB from taking place. We are grateful that the EIB decided to hear our appeal in spite of pressure being applied for them to refuse the Community a hearing.

The second instance takes the form of the above-referenced Motion to prevent one technical witness for the Community, Mike Schneider, from speaking about cumulative impacts of pollution and Environmental Justice. The Motion also seeks to prevent a non-technical witness, Miguel Acosta Muñoz, Co-Director of Earth Care New Mexico, from presenting "Earth Care's Interest in this Matter." In reading through EIB-248 Community Response to NMED Motion in Limine, one again becomes concerned about the perceived lack of separation between NMED and the EIB. We understand that the EIB was intended to be an independent body, yet it would appear that NMED may expect the EIB to rubber stamp its decision.

Our family supports the purpose of the February 23-25, 2022 hearing before the EIB, which is to respectfully ask it to reverse NMED's approval of AAM's Air Quality Permit. We believe that NMED's decision to approve the Air Quality Permit is not in the interest of Southside residents, families and children, who live, go to school, and recreate in close proximity to the proposed consolidated asphalt plant. And we believe that the basis on which the AQP was approved by NMED falls outside of legally permissible EPA emissions limits. This alone should be reason to deny, rather than approve, AAM's application for an Air Quality Permit.

Thank you for your time and consideration.

Sincerely,

Linda Marianiello and Franz Vote

A Photographic Tour of Polluting Industries on Santa Fe's Southside*

*Taken on Tuesday, February 15, 2022 by Linda Marianiello and Franz Vote, Tierra Contenta residents

The Route we took and will reference with the photographs is:

1. Photos 2856, 2857, 2858: AAM's facility at 3810 Oliver Road within City of Santa Fe Limits.
2. Photo 2859: Constellation Drive/Riverside Loop and Avenger Way.
3. Photo 2860-2861: From Riverside mobile home park looking toward AAM's plant in the city.
4. Photo 2862: Riverside mobile home park from Constellation Drive.
5. Photo 2863: El Camino Real Trail Head just north of Riverside mobile home park and adjoining an industrial site. Photo 2864 is of the sign at the entrance to the industrial site and right by the Trailhead sign.
6. Photo 2865: From Constellation Drive and looking west to the second AAM facility on Paseo de River on

the opposite side of 599. AAM claims that they are moving further away from the mobile home parks. Moving across to the other side of the highway and expanding operations to 24/7, 7 days per week does not seem like a move that would significantly reduce health risks to Southside residents.

7. Photos 2866-2867: truck traffic on 599 going north toward downtown Santa Fe. The amount of truck traffic in the areas we photographed was overwhelming. There was hardly a moment at which huge trucks weren't passing us in both directions.

8. South Meadows at the 599 interchange and traveling in the direction of El Camino Real Academy:

9. Photos 2868, 2869 and 2870: mobile home park and new apartment complexes from the S. Meadows/599 interchange.

10. Photos 2871, 2872 and 2873: New apartment complexes north of El Camino Real Academy on South Meadows.

11. Photos 2874, 2875 and 2876: Kates Way just off South Meadows, including a sign of a meeting regarding another proposed development on the opposite side of El Camino Real Academy and closer to Agua Fria.

12. Photos 2877 and 2878: Pre-Leasing sign at the entrance to the above-mentioned apartments, which we understand are intended to mainly house LANL employees. Are the people moving into these apartments aware of the pollution issues to the west of them on the opposite side of 599?

13. Photos 2879, 2880, 2881, 2885: More photos of truck traffic, in this case at Naumburg Industrial Park. Naumburg is just off Airport Road to the west of 599, including Colony Drive and Paseo de River.

14. Photos 2882 and 2883: The entrance to Naumburg Industrial Park at the intersection of Airport Road and Colony Drive. Photo 2882 lists the names of businesses located in the Park: Honstein Oil Company, Concrete Pumping, Roadrunner Redi-Mix, CBC, etc.

15. Photos 2886: The Penske truck rental lot adjoining Johnson Moving & Storage on Paseo de River.

16. Photo 2887 and 2895: Sub-Surface Contracting business on the west side of Paseo de River in the direction of the AAM facility at the end of the road. The second photo is of the same facility from the opposite side, driving away from AAM in the direction of Colony Dr.

17. Photo 2888: The AAM facility in the city on the east side of 599 as seen from Paseo de River.

18. Photo 2889: More truck traffic, including a Santa Fe County vehicle on Paseo de River, just before arriving at the AAM facility.

19. Photos 2890, 2891, 2894: approaching the AAM facility on Paseo de River. None of this was here when Franz and I went to this location shortly before the March 2020 NMED Hearing.

20. Photos 2892 and 2893: sign marking the entrance to AAM and prohibiting entry beyond this point.

21. Photos 2896, 2897, 2898, 2899, and 2890: Signs at the entrance of several businesses located on Colony Drive, including DBC Concrete Products & Supplies, Santa Fe River Pit, Santa Fe Classic Rock (they also applied for an Air Quality Permit last year), Roadrunner Redi-Mix. 2899 shows more truck traffic on Colony Dr. 2890 is of another industrial facility on this road.

22. Photos 2905, 2906, and 2907: Santa Fe Concrete facility on the south side of Airport Road, just across the street from the entrance to Naumburg Industrial Park.

23. Photos 2908 and 2909: The building in the

distance and the surrounding fields are unmarked, but we think they might be related to the Public Notice for Receipt of Discharge Permit Application DP-289, City of Santa Fe Wastewater Reclamation Facility. We saw trucks spreading a black substance on very large fields on this property. This is apparently a groundwater and drinking water issue.

24. Photos 2910, 2911, and 2912: Santa Fe Wastewater Treatment Facility sign and signage at the entrance to the facility.

25. Photos 2913 and 2914: Looking across 599 from Aviation Drive to the southernmost part of Vista Primera. Aviation Drive is just off Airport Road near the 599 intersection and goes to the Santa Fe Regional Airport.

26. Photo 2915: Looking toward Santa Fe Concrete from Aviation Drive.

27. Photo 2916: Airport Entrance sign on Aviation Drive. Photos 2917, 2918 and 2919 are of the Airport Terminal and surrounding parking areas.

28. Photos 2920, 2921 and 2922 show how close the SF Airport is to Tierra Contenta on the north side of 599.

29. Photo 2923 is another truck, this time on Airport Road at the 599 interchange.

30. Photos 2924, 2925 and 2926 are photos of the southernmost part of Jaguar Drive at the 599 interchange.

31. Photos 2927, 2928, 2929 and 2930 show new housing developments going in at the very south end of Plaza Central in Tierra Contenta. These new housing developments will go all the way to 599 with the Santa Fe Airport just on the opposite (west) side of 599.

All of the photos are posted at this link, and the entire set of 72 photos takes up 2 pages on Sync:

Re: ADDITIONAL COMMUNITY PETITION SIGNATURES SUBMITTED AS A
SUPPLEMENTAL FILING to Earth Care's Filing "Public Comments, Petition, and Photos for
Docket No. EIB 21-48"

Please accept these additional petition signature sheets from a 6th grade class at El Camino Real that were submitted by students this morning.

PETITION LANGUAGE

We residents of the impacted neighborhoods are concerned about the negative impacts this large operation will have on air quality; noise and vehicle traffic on public roads; that it will degrade natural beauty and quality of life for residents; exacerbate public health issues; and threaten wildlife, historic structures, tourism, water quality, water conservation, and property values.

Nosotros , los residentes de los vecindarios afectados, estamos preocupados por los impactos negativos que tendrá esta gran operación en la calidad del aire; ruido y tráfico de vehículos en la vía pública; que degradará la belleza natural y la calidad de vida de los residentes; empeorará los problemas de salud pública; y será una amenaza a la vida silvestre, las estructuras históricas, el turismo, la calidad del agua, la conservación del agua y el valor de propiedad.

1) We are concerned because there are more polluting industries coming here, increasing the impact on our children's lungs.
Homes, parks, and schools may become full of harmful dust, fumes, and residue. |
Estamos preocupados porque vienen más industrias contaminantes , aumentando el impacto en los pulmones de nuestros niños.

2) Homes, parks, and schools may become full of harmful dust, fumes, and residue. |
Las casas, los parques y las escuelas pueden llenarse de polvo, humo y residuos nocivos.

3) We are concerned about environmental racism. More and more polluting businesses are coming to the Southside of Santa Fe. This is the most densely populated part of

Santa Fe and is home to the greatest number of youth, low income, and immigrant families. | Nos preocupa el racismo ambiental. Más y más negocios contaminantes están llegando al Sur de Santa Fe. Esta es la parte más densamente poblada de Santa Fe y es el hogar de la mayor cantidad de jóvenes, familias inmigrantes y de bajos ingresos.

4) Our community is already the most impacted by COVID, and now we may see increased rates of asthma and other diseases in our children. | Nuestra comunidad ya es la más afectada por COVID, y ahora podemos ver mayores tasas de asma y otras enfermedades en nuestros niños.

5) We do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards. | No creemos que el permiso actual aborde adecuadamente las preocupaciones humanas y ambientales o los estándares actuales de la EPA.

6) We are concerned that the current operations of the company may not be compliant with air quality standards and that sufficient monitoring and oversight do not exist to protect our community's health. | Nos preocupa que las operaciones actuales de la compañía no cumplan con los estándares de calidad del aire y que suficiente monitoreo no exista.

7) Given the absence of this information, we are asking the EIB to reverse the permit approval because Associated Asphalt's operations have not been sufficiently monitored, compliance has not been proven based on appropriate standards, and the impacts to the community of the consolidated plant operation should be studied in the context of COVID-19 and cumulative air quality impacts in the area. | Dada la ausencia de esta información, estamos solicitando al EIB que revoque la aprobación del permiso porque las operaciones de Associated Asphalt no han sido suficientemente monitoreadas, no se ha probado el cumplimiento con base en estándares apropiados y los impactos a la comunidad de la operación de la planta consolidada deben ser estudiado en el contexto de COVID-19 y los impactos acumulados en la calidad del aire en el área.

8) We do not believe there was enough information nor data for the NMED to approve the Associated Asphalt plant's permit request | No creemos que haya suficiente información ni datos para que NMED apruebe la solicitud de permiso de la planta de Associated Asphalt.

We ask the Environmental Improvement Board to reverse the NMED's decision. | Le pedimos a la Junta de Mejoramiento Ambiental que revoque la decisión del NMED

IRONBOUND JUSTICE THE SACRIFICE ZONE – A DOCUMENTARY

Ironbound Justice

[Stop the Sludge](#)

The Ironbound in Newark, New Jersey, is one of the most toxic neighborhoods in America. For too long, the Ironbound has been deemed a Sacrifice Zone, a place where profits mattered more than the health and well-being of people – Black and Brown people.

Since our founding 50 years ago, Ironbound Community Corporation (ICC) has led the fight against the environmental injustices that have poisoned our community. Surrounded by polluting factories emitting poisonous chemicals, polluted waterways, an open sewage treatment plant, and emissions released by thousands of trucks and airplanes traveling through and over the Ironbound, our community is treated as an industrial wasteland...a wasteland that has made our community members disproportionately sick.

The Sacrifice Zone – A Documentary

[The Sacrifice Zone](#), a documentary film, by Talking Eyes Media, features ICC's fight against environmental injustice and environmental racism in the Ironbound. Featured at the [Montclair Film Festival](#), the film highlights the war waged by Maria Lopez-Núñez, community leader and member of ICC. Maria has dedicated her life to this constant fight against polluting facilities and a political system that does not take into consideration the lives of our people. The film follows Maria as she leads the current fight with our community for the right to breathe clean air. We invite you to host a screening of the event.

[Watch the trailer here.](#)

[Request a screening here.](#)

**STRONGEST ENVIRONMENTAL JUSTICE BILL IN THE COUNTRY
SIGNED INTO LAW**

After a decade-long relentless battle, ICC, along with our environmental justice partners, NJEJA and Clean Water Action, helped to pass the strongest environmental justice bill in the country. On September 18, 2020, Governor Murphy signed into law, S232, which gives the New Jersey Department of Environmental Protection the authority to deny permits due to cumulative impacts of pollution in environmental justice communities – including the Ironbound. This is a critical step towards ensuring that all residents of New Jersey, regardless of their zip code and color of their skin, have the right to good health, clean air, and safe waters.

[See Bill Signing Video Here.](#)

To learn more about our work, or for more information about ICC's efforts please reach us at info@ironboundcc.org.

Los Angeles city council votes to ban new urban oil and gas drilling in historic move
The ordinance will also look at how to decommission existing wells operating across the city

Children play in the front yard of their home across the street from the Jefferson oil drill site, surrounded by towering fences, in Los Angeles. Photograph: Jae C Hong/AP

[Gabrielle Canon](#) in Los Angeles

[@GabrielleCanon](#)

Wed 26 Jan 2022 18.34 EST

First published on Wed 26 Jan 2022 15.11 EST

Though better known as the homeland of Hollywood, Los Angeles was built on oil. More than 5,200 oil and gas wells sprawl across the city, making it one of the largest urban oilfields in the country.

But on Wednesday, the Los Angeles city council voted unanimously to phase out drilling in the city, a move environmental justice advocates have been working toward for years.

The city will now move forward with drafting an ordinance to ban new drilling and evaluate how to shut down operating wells across the city. Officials will also initiate an analysis of the economic and job impacts and how to transition oil industry workers to clean energy jobs. In order to decommission existing oil operations, an amortization study must also be done on how oil companies can make back their investments if they have not already done so.

“From Wilmington to the San Fernando Valley, gas, drilling and oilwells have disproportionately affected the health of our working-class neighborhoods,” said the council president, Nury Martinez. “This is yet another example of how frontline communities disproportionately bear the impacts of pollution and climate change.” Calling the move one of the strongest policies in the entire nation, she said that “Los Angeles is a city that constantly leads the way and today let it be a reminder that the city council prioritizes the health and wellbeing for every Angeleno.”

Other members echoed her sentiments, voicing adamant support for the shift away from fossil fuels development. **Many of them credited Stand LA, a coalition of environmental justice organizations founded in 2013, which has spent years organizing around the the issue and highlighting the devastating impact drilling has on residents.**

Nearly a third of Los Angeles oil and gas wells lie outside drill sites, scattered between homes, schools and parks, noted Vince Bertoni, director of planning for the city, citing data by the California geologic energy management division in a letter issued to the council last September.

Thousands of residents live in close proximity to wells but the toxic effects are not evenly distributed, with less affluent Angelenos and people of color bearing the brunt of their environmental impact.

A slew of studies have shown the toll drilling can have on public health, including higher rates of asthma and cardiovascular disease and increased risks of babies with low birthrates and other reproductive health issues.

In a paper published last year, researchers from the University of Southern California (USC) noted that South LA residents – predominantly Black and Latino families – who live near active oil development have lower lung function. Deficient lung capacity “may contribute to environmental health disparities”, the researchers said, likening the health effects to daily exposure to secondhand tobacco smoke.

Even the drill sites no longer in use pose a threat to health and the environment. According to an LA Times investigation published in 2020, abandoned wells in the city are still emitting toxic gases.

“In this community-driven research, we found that living close to oil sites is associated with lower lung function,” said the researcher Jill Johnston, an assistant professor of preventive medicine at USC’s Keck School of Medicine in a statement, adding that “these impacts raise environmental justice concerns about the effects of urban oil drilling”.

Oil industry officials cited the potential for negative economic impacts to the city in their criticism of the move, and the 8,300 jobs associated with extraction and development.

“Shutting down domestic energy production not only puts Californians out of work and reduces taxes that pay for vital services, but it makes us more dependent on imported foreign oil from Saudi Arabia and Iraq that is tankered into LA’s crowded port,” Rock Zierman, CEO of California Independent Petroleum Association said, noting that California’s crude is more regulated than imports. He also questioned the city’s ability to legally move forward with the plan. “Taking someone’s property without compensation, particularly one which is duly permitted and highly regulated, is illegal and violates the US constitution’s fifth amendment against illegal search and seizure,” he said.

Kevin Slagle, a spokesman for the Western States Petroleum Association, argued in an email: “An energy transition that can actually work for communities, families and workers will not be accomplished through production bans and mandating people out of their careers.” He added that climate goals would “best accomplished through collaboration and the innovation and hard work of the people of our industry”.

The city’s decision follows a separate motion from the Los Angeles county board of supervisors, which voted unanimously to phase out drilling in unincorporated areas last September on similar grounds. Supervisor Holly Mitchell, who penned two motions on the issue, said that of the tens of thousands of people living near drilling sites, close to 73% were people of color. The Inglewood oilfield – a site that has on average produced up to 3.1bn barrels a year over the last decade – falls in Mitchell’s jurisdiction.

“In addition to this equity issue, which should concern all of us, oil and gas drilling is contributing to the climate crisis, which we are collectively bearing witness to every single day,” Mitchell told the LA Times in September.

The state of California is also moving forward with new rules requiring drilling to be set at least 3,200 ft from “sensitive locations”, which include homes, schools and hospitals. State officials are undertaking a comprehensive economic analysis of the proposal. The plan, which was praised by environmental justice advocates, has been

criticized because it enables existing wells to continue operating and only applies to new development. The California department of conservation geologic energy management division found roughly 30% of the state's production occurs within the 3,200ft threshold.

Los Angeles is planning to go further.

"It has been a long slog," said councilmember Paul Koretz during the meeting, highlighting the ways in which drilling in his district has harmed residents. "This effort is over 100 years overdue – and it is about time."

Subject: Public Comments, Petition, and Photos for Docket No. EIB 21-48

Dear Honorable Hearing Officer,

Earth Care is a community-based, member-led organization on Santa Fe's Southside. We have over 4,000 members and supporters.

Through door-to-door canvassing, neighborhood meetings, notices, and presentations in schools, we worked to inform our members and community of the proposed expansion and air quality permit sought by the Associated Asphalt and Materials LLC from the New Mexico Environmental Department last year. We supported our members' and community's participation in the NMED public hearing process. Our members and community have continued to stay engaged.

We are submitting a number of documents that have been prepared by our members and community expressing their support for the Appeal before you as well as their testimony. The community is clearly asking for the reversal of the NMED decision and reconsideration based on appropriate air quality standards and data.

Attached please find:

- 1) Over 200 comments and testimonials submitted by members and residents, including children who attend schools in the area, who wanted their voices to be included in this hearing process and who expect their concerns to be considered before you make your decision.
- 2) Attached please also find a community petition signed (online or in-person) by 596 Santa Fe residents, the vast majority of whom live in the immediate impacted area.

Please accept this public testimony as part of the official record of the case.

Thank you,

Domenica Nieto
Environmental Justice Organizer
Earth Care

1.COMMUNITY COMMENTS & TESTIMONY

- 3rd-grade students at El Camino Real Academy.	“Some people think that because we live on the Southside, we don’t have enough money and that we don’t have a strong enough voice. They wouldn’t build this Asphalt Plant downtown because those people would fight against it. We can fight back on the southside too!”
Jazmín Rodriguez Lopez	As a young person living in the Southside of Santa Fe I am asking the Environmental Improvement Board to reverse the NMED’s decision.
Seneca Johnson	Our community members deserve to live long and healthy lives and to know that those who come after us will have that same opportunity. Adding more polluting sources near our neighborhoods, schools, and parks doesn't support healthy lives or a healthy community, and we demand better.
Elena Valdez	I am a mother of a toddler and a runner. I want my child and the other children of our neighborhood to breathe clean air when they are outside. I want my community to be able to enjoy the little access we have to trails and open space on the Southside without worrying about how the air might affect their health. Why do companies and our local government always devalue the health, safety, and joy of people who reside on the predominantly working class side of Santa Fe?
Rosario H Torres	I have been a volunteer at a Southside school for over 8 years. I am very familiar with the health, income, housing, and overall disparities affecting the neighborhoods in this part of town. I oppose this permit as it is clear that our health and well being are at stake with this expansion.
Mary Ann Maestas	There needs to be better air protections and monitoring of pollutants. The current permit doesn't address our human and environmental concerns or the current EPA standards. Sufficient monitoring and oversight do not exist to protect our community's health. Several community members spoke up in early 2020 regarding smells and fumes from the plant in their nearby offices but there was no follow up or inspection of the plant. This may be due to lack of resources of NMED but it cannot be appropriate for this and not giving enough information and data to the community.
Rebecca Smith	I am very concerned about the decision to grant an air pollution permit to Associated Asphalt and Materials, LLC. Not only was the permit issued in violation of EPA guidelines but the decision is also a blatant example of environmental racism as the Southside of Santa Fe is home to the greatest number of youth, low-income, and immigrant families. Prioritizing this company over the health of our community members is disgraceful. Please reverse this decision!
Yessenia Sanchez	Tengo miedo al foco de contaminación , miedo por mis hijos y por todos los niños que vivimos y las demás familias , NO ESTOY DE ACUERDO.

Alfonso

siento enojada porque están tratando de hacer
una fábrica cerca de nuestra escuela. Y
los niños se pueden enfermar si los niños
lo respiran.

My name is **Kimberly Aparicio**, I am 17 years old and attend Capital High School, I live at 4129 south meadows. I learned from a family member about Associated Asphalt and Materials' permit application and it created anger and fear in me. Anger because why do we have to have it on our side of town, why not downtown? Fear because how will our city look like with so much air pollution? I am testifying here today in opposition to the permit application before you. I would be directly impacted because I live nearby . I have lived here my entire life and would hate to see that happen. My school is also nearby. The real question is how wouldn't it affect me or my sisters and brothers and parents or a family member who lives close by in Cottonwood or Riverside. With this asphalt plant being so close we could face health problems, people in my family have Asthma. My greater concerns are that my little cousins would have to go to a school with this bad air pollution. My family member, like my mom, works near there and so does my dad.

I would like to ask those responsible, or to anyone who will be making the decision, do any of the people proposing live nearby on the south side of Santa Fe? Do your children attend any schools there? How would you feel about a situation like this. How is this fair to us? Is it because we are the lower income area of the city or because we are the side with the immigrant community. This is not fair that we have to deal with this all day, all night every day. How will our city look in a year with all this pollution? Who will be affected by this. Most certainly not you who probably don't live here. We already have so many things on our side of town like the sewage plant that we have to deal with, why do we have to deal with more. Please, to you who will be making a choice I ask you to deny the permit. This will be bad for our health and bad for our community. I want you to treat me with the same respect as the people in downtown Santa Fe. Your priority is to keep us safe and prevent more health issues. We are already dealing with COVID-19. Invest in a healthy, more safe community. Invest in more teen centers in our area.

Maria Guadalupe 2500 S Meadows Rd, Santa Fe, NM 87507 vivimos un poquito cerca de la planta. Temo por mis hijos. I have 4 kids ages 12,10,8,6. El mayor tiene asma. Temo perder a mis hijos. La concentración de las plantas nos afectará en forma negativa. Sin saber si fuimos infectados por COVID, cómo podemos saber el impacto de la contaminación de esta planta junto con las demás industrias que se han colocado ahí. En seguida están las canchas de fútbol. Como pueden poner estas industrias en donde nuestros hijos van a jugar. Deberían de poner un parque mejor.

Good evening Hearing Examiner. My name is **Alejandra Bojorquez** 37 Reata Rd. Santa Fe NM. Soy una niña y tengo 9 años. Vivo con mi mama, mi papa y mi hermano de 8 años. No quiero que aprueben el permiso para la planta porque puede afectarnos a las personas y a los animales. Yo y mi familia podemos respirar el humo. Queremos más arboles y parques, más tiendas y actividades para niños.

Gabriela Marquez Villegas 1449 Zepol Rd Apt 101 Santa Fe NM 87507 I live on the south side of Santa Fe, and work at El Camino Real Academy in Santa Fe. My children also go to school in the area. I live with my husband, my brother in Law, my daughter and my son. My children are 10 and 19 years old. My daughter attends El Camino Real Academy and my son studies at Santa Fe Community College. We all have allergies to environmental factors, there is also high blood pressure in the family and after COVID exposure, various types of respiratory problems. I'm a teacher, and one of my coworkers shared his environmental concerns with his students, including my daughter, who was invited to a meeting with Earthcare. She and I learned so much about all the things we can do to protect our communities and our health. The NMED had as their obligation to attend to the environmental needs of the people, and as public servants it is their obligation to protect the well being of the people they represent, and we should be protected equally. Any decision should be made with the community, imposing decisions is not democracy. Democracy is representative of the people and their interests, taking into consideration what we want and need. All the students in our local schools are your citizens and it's your obligation to protect them too. We don't need more contamination. We need community centers to develop a healthy community, parks, green areas, libraries, sidewalks, public transportation and affordable housing. The multicultural characteristics of the population in the area are vast and rich. We have the basis to develop a great variety of food, art, furniture and other artisanal goods. A market with multicultural elements would be rich and viable to help Santa Fe culture, language and the economy. A community Center with a library, opportunities for physical activities and garden to plant and grow food. We need solar energy and sustainable resources, economy and inclusive education and culture. This is an opportunity for the state agencies to listen and hear what we need. If what we are requesting is not listened to the environmental, social and economical consequences will be so much more expensive for agencies, the losses of people would be irreparable.

Priscila Marquez 2500 S Meadows Rd, Santa Fe, NM Tengo 10 años y vivo cerca de la escuela El Camino Real Academy. Esta planta de asfalto va a afectar todo, mi salud, y la de mi mamá, mi papá, y mi hermana. Yo tengo 9 años y participo en esta campaña con mis compañeros de la escuela El Camino Real Academy. Esta planta va a poner en riesgo la salud de todos los niños y adultos jóvenes, todo el aire va estar contaminado y vamos a crecer en un ambiente contaminado. Está en peligro la salud de nuestros abuelos, papas y de los animales. Yo y mi familia queremos estar sanos, con salud, por eso no queremos esa planta que van a expandir.87507.<https://drive.google.com/open?id=16MQtq6PB7TvKb8Ek72qJQb7c4ogLVUxF>

Emy Meraz 2500 S Meadows Rd, Santa Fe,NM 87507 Soy Emy, tengo 9 años, y mi maestra en 21 century nos habló de la planta y hablamos del mal que nos puede hacer por eso yo no quiero la planta de asfalto cerca de mi casa ni de mi escuela. Totalmente va a afectar mi salud, va a afectar como crezco y va a afectar a mi comunidad. Vivo cerca de la escuela Camino Real Academy, en el sur de la ciudad de Santa Fe, junto con mi mamá, mi papá, 2 hermanas, 2 hermanos, y mis tíos. Mis papás se preocupan porque temen que nos vayamos a enfermar, tal vez

morir, que la contaminación nos haga mucho daño. Por favor, no aprueben el permiso. Queremos aire fresco y limpio, que nos pongan más parques, más árboles y plantas, y lugares en donde los niños puedan jugar.

<https://drive.google.com/open?id=1jmaUgdRpWT5qO1PdUIUx4X7Uvfzk1ham>

Gabriela Rodriguez 1449 Zepol Rd. Apt 101 Santa Fe NM 87507. Hi! I am Gabriela Rodriguez. I am 11 years old and I go to school at El Camino Real. I live nearby with my mom, my dad, and my brother. Our family suffers from allergies and some also have heart problems. I got involved in this campaign because I care about our health and I want us to have a good future. This plant could give us asthma and breathing problems, that is my biggest concern. I want them to not build the plant and to instead make a new park or plant more trees. We want to be treated better instead of them only thinking of the money and not our health. Instead of the plant we want more parks and trees.

<https://drive.google.com/open?id=1UNNGH0XZ55Hpghmk1WFFyLZLfJlh6VV9w>

Miriam Luevano 3832 Riverside Dr. Mi nombre es Miriam Luevano. Soy maestra y madre de familia. Cuando me di cuenta de esta situación por la organización de Earth Care, empecé a involucrarme. Esta planta, y la consolidación, me afectaría ya que vivo muy cerca del lugar donde la pondrían. Pondría a mis dos hijos en riesgo. Mi hija tiene 10 y mi hijo 7 y van a la Cesar Chavez Elementary. Mi hijo tiene asma y temo que esto empeorará su salud. Esto puede afectar el desarrollo de mis hijos y mi comunidad. Me preocupa la salud de mis seres queridos. Me gustaría que se pusieran en mis zapatos, porque me imagino que a ellos no les gustaría que sus hijos vivieran en un lugar en donde el medio ambiente se respira tóxico. Me gustaría que se me tomara en cuenta tanto a mi como a mi comunidad. Quiero un ambiente limpio, libre de plantas tóxicas. Quiero centros de aprendizaje, parques y áreas para caminar seguras y alumbradas. Por favor escuchen nuestras palabras! Tomen en consideración la salud de mi familia y mi comunidad!

https://drive.google.com/open?id=1YNW_NmsPLb3pHr5JukVWBzltxcJHIGW9

Janinne Garbalena 3832 Riverside Tengo 10 años, estoy en la Cesar Chavez y vivo cerca de la planta junto con mi mamá y mi hermano de 7 años. Esta fábrica me afectaría en mi salud. Mi mamá me ha enseñado de la naturaleza y del lugar en donde estamos viendo. También nos enseña de la salud y cómo vivir bien. Estas fábricas van a afectar a nuestra comunidad también. Queremos cosas bonitas y positivas mejor. Más respeto y felicidad.

https://drive.google.com/open?id=1-Nl8Jb1V9WaIfGUT_AC4oSiqPZ5YyBpG

Samantha Gonzalez Ramirez Tengo 10 años y soy alumna de la escuela de El Camino Real. Vivo cerca de la escuela con mi mamá, mi papá, y mi hermano. En Guatemala viven dos hermanas, y un hermano. Esta fábrica va a contaminar el aire, va a contaminar todo. A mí me preocupa que nos podamos morir por toda la contaminación que hay en el mundo pero lo podemos recuperar si ya no tiramos basura y mejor reciclamos, y si niegan los permisos a plantas como esta. En la escuela me dicen que haga cosas buenas por mi salud y por la tierra. Esta planta

no es buena, lo que quiero es que planten más árboles y más plantas nutritivas. Mi familia y yo queremos salvar el planeta. El gobierno debería de querer lo mismo.

<https://drive.google.com/open?id=1KiGVZWSCfxjQaut7KlwnvltSE4ZjkhsK>

Stephany Marquez 1004 Calle Don Roberto, Santa Fe, NM, 87507 Personally I will be directly impacted because I live nearby this proposed plant. Not only will it affect my health, but since my brother will also be attending El Camino Real next year it will affect his health as well. My dad, brother, and myself live in my house. No one in my family has health issues. My name is Stephany Marquez and I am 16 years old. Currently I am a Sophomore at Tierra Encantada charter school. I have always been interested in overall environmental topics, since my cousin was in this community group she invited me to join which is how I became involved with this campaign. My greatest concerns would have to be for everyone's health. like I have been mentioning before. I would tell the decision-makers to deny the permit because it will have more negative impact rather than positive ones. I want the Environmental Department and decision-makers to treat my community when making decisions like this would probably take all aspects into consideration. Like; health, lifestyle, the impacts it will make either positive/negative, etc. I really want a clean and fresh environment for my family. Some things I would like to have in my neighborhood would probably be a cleaner environment. For example, I live close to the acequias park and even though it is clean, making some upgrades would make it a better environment. Some business opportunities I would rather have for my community would probably be things that are positive for the environment. Like helping plant trees or working in support of different groups that will help our community. Some community development projects I would rather have would be career and college based training and education <https://drive.google.com/open?id=17SNbW5HcUPf9oTZV2CzOUyyRsWEuA15c>

Maria Martinez 2742 Sycamore Loop, Mi nombre es Maria Martinez y mi participación en esta campaña es por mis hijos, mi familia y mi comunidad. Esta planta nos afectará demasiado ya que vivimos cerca y mi hijo asiste a la escuela Camino Real. En nuestra comunidad no tenemos parques, no tenemos biblioteca, no hay tiendas para comprar comida, ni espacios para recrearnos. Pero lo que sí hay son demasiadas industrias que contaminan el aire y afectan nuestras vidas. Yo les pediría que tomen conciencia de todo el daño que ocasiona a los habitantes que viven cerca y sobre todo a todos los niños que asisten a la escuela, a las mujeres embarazadas cuánto daño les haría respirar ese aire contaminado, las personas mayores. Ya lo dije anteriormente y en pocas palabras que nieguen ese permiso y piensen en su familia si estuvieran viviendo ahí cerca.

<https://drive.google.com/open?id=1vNKP8x7rm7ykLFB4cXi9Oic1ceiIdS9c>

Patricia Chillon Garcia 6333 Paseo del Sol West. My name is Patricia Chillon-Garcia. I am a sixth-grade teacher at El Camino Real Academy and my 5-year-old daughter is a student at this school. I am attending the community meetings of the Earth Care organization and as soon as I found out about the situation and location of the asphalt plant, I wanted to take measures above all to protect our children and families in the South Santa Fe area. Families in which I include myself since this is the community in which I also live. I live in the southern part of Santa Fe and

I am directly affected by the construction of the plant. In this neighborhood there are many families with young children and also older retirees. My husband also has asthma and will be impacted. In my classes, we have done an investigation to understand the impact that the toxic substances contained in asphalt gases (hydrogen sulfide, sulfur dioxide, carbon monoxide, nitrogen oxides, arsenic, benzene and cadmium and solvents such as toluene, xylene, and naphtha, as well as styrene, asbestos, and silica) have on people's health and the results have left us very alarmed and concerned since the effects include serious respiratory ailments, headaches, itchy throat and eyes, rashes, dizziness, fatigue, poor appetite, and even cancer, especially if there is an overexposure to these gases. We are very concerned about the proximity of the plant and the fact that it is going to operate 24 hours a day. We wonder if the relevant studies have been made of the impact that these gases have on the environment and on people and if an exhaustive study has been made of safety and of the distance that these plants should have with respect to population centers. We understand that asphalt is an important material but we are concerned that the relevant studies have not been carried out on the impact of this plant on the environment and on the health of the communities that are close to this plant. In addition, we consider that the reduced distance between this plant and the areas of public use, neighborhood communities, and school facilities is not being taken into account. Those of us who live in this area can smell the gases from the La Bajada mine and that is at a greater distance than the one planned for the asphalt plant. La prioridad de las autoridades debería ser la salud y el bienestar de los núcleos de población y el evitar el impacto negativo que este tipo de plantas tiene en las personas y en el medio ambiente intentando mitigar o eliminar sus efectos dañinos y seriamente perjudiciales para la salud. Queremos que haya un trato igualitario, equitativo entre comunidades. Al igual que está fuera de lugar poner una planta cerca de El Dorado o el centro de la ciudad, debería estar fuera de lugar construirla cerca de una comunidad creciente como es la de la Zona Sur. Más aún a sabiendas de que muchas de las personas que viven en esta comunidad no tienen aseguranzas de salud. Por otro lado nos hubiera gustado que nuestra comunidad hubiera sido informada de la manera que corresponde en estos casos. El protocolo dice que al momento que se presenta la petición tiene que haber un informe bilingüe a la comunidad y un aviso previo de 30 días. Queremos un medioambiente sano y limpio. Queremos equidad, queremos que se respete la comunidad del sur y que se tenga en cuenta que esta comunidad del sur está creciendo y que es una zona con muchas escuelas que hay que respetar como el resto de las comunidades de nuestra bella Santa Fe. Creemos que la ubicación de esta planta promueve el racismo medioambiental y que es hora de replantearse la planificación industrial de la ciudad, es hora de un “rezoning” de la zona industrial. Queremos que haya un estudio fiable y exhaustivo del impacto que tienen en el medio ambiente y en la población este tipo de fábricas. Queremos embellecer y potenciar esta zona de la ciudad y promover un espacio seguro para todas las familias que viven aquí y para los jóvenes y para las generaciones futuras. We want a clean and healthy environment. We want equity, we want the southern community to be respected, and to take into account that this southern community is growing and that it is an area with many schools that must be respected as the rest of Queremos negocios que den oportunidades de trabajo pero que sean negocios saludables y seguros que respeten el medioambiente. We want businesses that provide job opportunities but are healthy and safe businesses that respect the environment. Centros

comunitarios, más parques, más zonas de recreación, etc. Community centers, more parks, more recreation areas, etc. Una pregunta, si ya hay una planta de asfalto, para qué hacerla más grande y contaminante. One question, if there is already an asphalt plant, why make it bigger and more polluting.

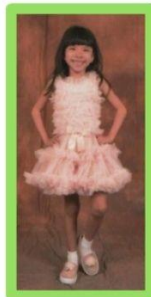

My name is **Esteban Aguilar** and I live close to the south side of Santa Fe, and work as a Real Estate Agent with Equity New Mexico in Santa Fe, New Mexico. I went to school in this area and my older child also went to school in the area. I live with my wife and my younger son. My children are 25 and 16 years old. My older son attended Sweeney Elementary, Ortiz Middle School, and Capitol High school, and my 16 year old son went to Cecar Chavez Elementary and now studies at Santa Fe Community College, in the Master's Program.. We all have allergies to environmental factors, and my wife has had various types of respiratory problems in the past. I'm a Realtor, and some of my clients have shared with me their environmental concerns about how this will greatly impact the value of their homes, and how this can also bring a deficit to their families, this is including my two sons, who know I'm involved with Earthcare. Them and I learned so much about all the things we can do to protect our communities and our health. The NMED has as their obligation to attend to the environmental needs of the people, and as public servants it is their obligation to protect the well being of the people they represent, and we should be protected equally. Any decision should be made with the community, imposing decisions is not democracy. Democracy is representative of the people and their interests, taking into consideration what we want and need. All the students in our local schools are your citizens and it's your obligation to protect them too. We don't need more contamination. We need community centers to develop a healthy community, parks, green areas, libraries, sidewalks, public transportation and affordable housing. The multicultural characteristics of the population in the area are vast and rich. We have the basis to develop a great variety of food, art, furniture and other artisanal goods. A market with multicultural elements would be rich and viable to help Santa Fe culture, language and the economy. A community Center with a library, opportunities for physical activities and garden to plant and grow food. We need solar energy and sustainable resources, economy and inclusive education and culture. This is an opportunity for the state agencies to listen and hear what we need. If what we are requesting is not listened to the environmental, social and economical consequences will be so much more expensive for agencies, the losses of people would be irreparable.

Isabel de Santiago: I live in Santa Fe N.M. and have several loved ones that live on the southside of Santa Fe. I recently learned of an asphalt plant that is wanting to create business in that area. As a healthcare professional, I am concerned of my loved ones well being. There is plenty of space elsewhere to create this type of business, away from any community. Why is it that plants like these always want to create business in low income areas?

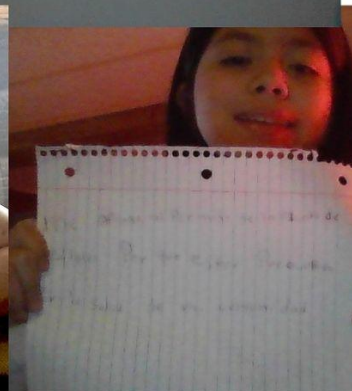

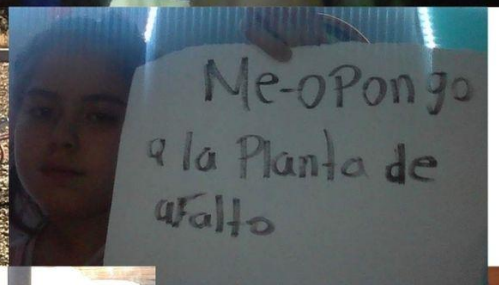

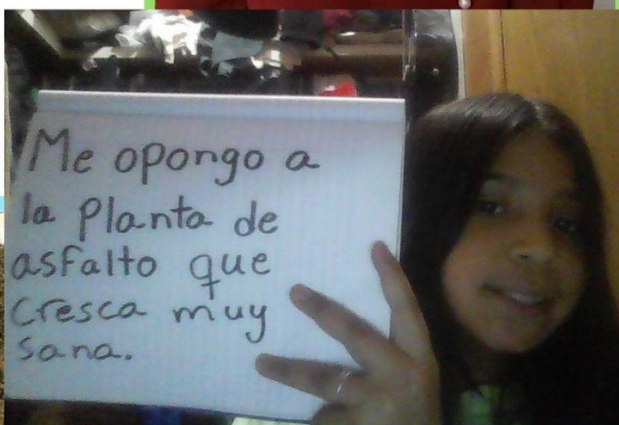

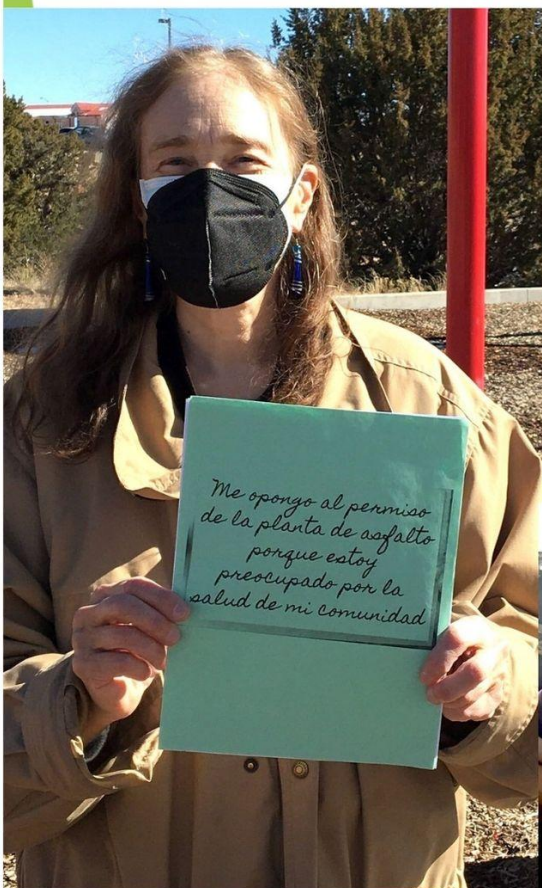

I know that around that area there is an assisted living/memory care facility where the elderly will be affected by the toxic air pollutants that this plant will create. There are schools in that area as well, where children will also be affected by the pollution created by this asphalt plant. The NMED had an obligation to protect equally regardless. These type of decisions should be

revised, carefully considering the harm these businesses will bring to the community and the burden it will bring to the state once we see community members becoming ill due to the many toxins brought upon them. It is time for the state to listen to the needs of this community and to think of the harm this asphalt plant will bring in the long run. It is time to think of the expenses that will pile up on the state due to an asphalt plant that could have created business elsewhere. If this plant already has business in New Mexico why does it want to expand more and why does it want to build in a community where many will suffer from the toxins they will bring? I heard that it is because the owner has a dream, what about the children in that community that also have many dreams and they could be shattered due to the many illnesses the asphalt plant will cause? It is my knowledge that these asphalt plants can cause central nervous system issues, cancer, asthma/respiratory issues, skin irritation and more. It is time to think of the people in this community!

My name is **Selma Gutierrez** and I am representative of the Santa Fe Mutual Aid. A network of residents in Santa Fe County that have been providing support to one another during the COVID-19 crisis. I am here to represent the many members of the network who reside in the airport road neighborhoods. The majority of our 1300 members live in the Airport road corridor. Throughout history and throughout many cities, people of color and marginalized communities have been taken advantage of and not accounted for. We are repeating history if we follow through with this permit without adequate information about the health impacts. In the New Mexican news article “company holds meeting to address concerns on asphalt plant” that only around 70 people came to this meeting. That does not cover not even a fourth of the community's population. This information is not being reached to the right areas and many of these community members are not being accounted for. We have shared information through the network and the overall sentiment of residents extreme concern. You might know that the southside of Santa Fe in area code 87507 has been one of the areas hardest hit by the pandemic. Their health is at risk and they are not even aware of all of the details of this proposal. As a member of the community and having always lived on the south side of Santa Fe, I am here to be their voice and ask you to deny this permit until the company can prove that residents in the area who already have asthma, allergies, or COVID will not be adversely affected. Thank you for your time.

**No quiero la planta
de asfalto, quiero
árboles y crecer
sana.**

Allison Fabara	Please reverse the approval of the Consolidated Asphalt plant permit.
Amber Anastasion	We do not want factories on the south side of Santa Fe. We are concerned that it will negatively impact the air quality and pollute the environment. This factory is close to schools and neighborhoods.
Amy Jo Christian	Our city must address the concerns coming from local families and put a stop to allowing toxic industries to pollute and endanger our neighborhoods. Say NO to the asphalt plant - it is not safe for our air or water and allowing it is blatant environmental racism.
Analicia Guitron	We should be protecting our children more than the corporations.
Angie Walker	Bring parks and sidewalks to the Southside, not polluting industries.
Arin Dineen	This is so important for our neighborhood!
Artemisio Romero y Carver	The constant placement of pollutant industry near ghettoized and minoritized populations constitutes cold genocide.
Ashley Zappe	Santa Fe has wonderful air quality so far. Please do not approve further pollution!
Aviva Hirsch	We do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards.
Bette N Evans	Please do not continue to pollute Santa Fe, particularly the South Side!
Bev Hedin	Please do Reverse this Asphalt Plant permit, New Mexico people deserve clean air & environment!
Bianca Sopoci-Belknap	Please hold the Environment department accountable for applying the most up-to-date standards to protect our air and our health. Thank you!
Bob Alei	Move it up to Aldea or Las Campanas
Brenda Bailey-White	As a former reviewer for National Environmental Policy Act (NEPA) compliance, I know all too well that the least harmful action is not always chosen, despite informed public input. Working in Albuquerque, I am also aware that the major air polluter of our city is a facility to the east, similar in nature to the Santa Fe operations in question. I stand in solidarity with my Santa Fe neighbors who demand consistent air quality monitoring and point source testing. This the Climate Emergency public involvement that New Mexico needs and deserves. Leadership and regulatory response should be no less diligent. Thank you for the opportunity to provide comments.
Brenda E. Euwer	stop with your dirty factoreis - killing us- figure it out - clean it up or go away.
Brett Davis	"I live on the Southside and want to fight to protect it -- discussions of our beautiful "City Different" often overlook the Southside."
Bruce Willson	It is too close to schools and houses
Byron Gross	"I believe there should be equality in how communities are treated in Santa Fe. There is plenty of open space far from adjacent communities where the asphalt plan could be

	located."
Carly	I live on the south side and I was concerned to that this could cause an increase in air pollution
Carol I Johnson	The approval of the Consolidated Asphalt Plant Permit needs to be reversed until the impact on air quality on the health of community residents can be determined.
Castille Aguilar	I am deeply concerned for our community's health and safety. Not only should we not continue to sacrifice our low income and people of color, but especially our young people. We should not continue with this project, with the consideration of our community's health and voices.
Catherine Yow	Everyone deserves a place to live, work, play, worship, EXIST safely Fuel our present and future generations of people to be able to have a safe place and have the nature of their area be able to stay intact and not be encroached upon by this potential asphalt plant This especially applies to the blatant environmental racism of this potential asphalt plant that will disproportionately and directly harm communities of color, lower income residence areas, and communities with a significant portion of immigrants.
CHERYL D ODOM	Stop dumping everything no one else wants on the Southside!
Chloe	Although I do not live in the area that this proposed assault expansion would directly affect, I am part of the Santa Fe community. It is the duty of the community; including those who already approved this, to protect one another and everyone's human right to a clean environment. This proposed expansion could be very harmful to the community members who are living and going to school in this area and takes away their human right to a clean/healthy environment.
Christopher Chappell	As someone with a chronic health issue related to human pollution, I think it's horrific that this permit has been approved so close to so many people and neighborhoods. It is a blatant example of environmental racism and classism, given that this is the lowest income area of Santa Fe with a high percentage of POC. Please reverse this permit decision for the health and well being of the residents of Santa Fe County.
Cipriana Jurado Herrera	No más contaminación en nuestras tierras.
Clifton Bain	The air pollution impacts of this are detrimental to the health abd welfare of the people who live, work and visit this neighborhood
Cretel Cortez barrita	Esto está contaminando nuestra ciudad tan bonita que tenemos me opongo rotundamente no más contaminación para la ciudad de santa fe
D Tsewang	Lets protect our community's vulnerable health. Thank you
Daniel Piburn	We must stop forcing our communities to endure environmental and other harms to

	advance, profit-over-people business models. Thank you
Daniel Ramirez Vargas	Es dañino para el area en la que vivimos
David F Garcia	protect the environment for everyone and thing.
Deborah Reade	This asphalt plant will pollute the local neighborhood. This kind of industry should never be permitted where people live and work and where children go to school. Plus, the public process for the permit for this facility was defective and discriminatory and should be completely re-done so the voices of all affected people can be heard.
Deirdre Downs	"If you ever wonder if this kind of thing is okay, just imagine if the same asphalt plant was being planned for the East side of town... smh in disgust."
Denise Silva	I agree that the plant would have a negative effect on our natural resources, and would present pervasive health risks to the city of Santa Fe, in particular the south side. This is yet another example of how the health of lower-income people are disregarded.
dixmarie deLaneuville	Be better. Do better.
Don Hyde	Please reverse the permit approval for this asphalt plant.
Donald Murray	reverse the decision. do not grant a permit
Dora Maria Campos	Contaminaria el medio ambiente
Douglas Belknap	Too much industrial air pollution possible affecting largely residential area/schools. Young people's lungs are much more vulnerable to pollutants, too.
Earnest Keiser	This is a capital city not an industrial waste zone. Protect our children and the environment by denying all industrial permits within the city and the county. Other communities need the development and the jobs.
Eden Radfarr	NMED needs to take social and environmental justice seriously - please reverse their decision that was harmful to both
Elaine Cimino	NO Asphalt Plant No more bad planning projects No more disparate impacts No more approvals without considering GHGs
Eleanor Bravo	No to asphalt plant permit
Elena Gonzales	Please reverse the permit approval - for our future and our health! Apply the appropriate EPA standards and use the data from current emissions
Elena Sopoci	"Santa Fe's air quality is so much better than much of the rest of the country - this kind of assault on air quality has no place near homes and schools. Also the noise and traffic would be very disruptive. Why do poor people have to bear the brunt of polluters?"

Elena Valdez	I am a mother of a toddler and a runner. I want my child and the other children of our neighborhoods to breath clean air when they are outside. I want my community to be able to enjoy the little access we have to trails and open space on the Southside without worrying about how the air might affect their health. Why do companies and our local government always devalue the health, safety, and joy of people who reside on the predominantly working class side of Santa Fe?
Elise Fagan	"I support the youth of Santa Fe. They should not have to live and attend school next to an asphalt plant."
Elizabeth	Me preocupa la salud de mis hijos y de mi familia. Y de toda la comunidad en general.
Ella	This plant poses major concerns to public health and safety of the communities in the area. Especially the many kids who are living, going to school, and playing in the area.
Ellen Ackerman	Do we really want to increase environmental racism in Santa Fe? How about siting this plant on the north or east side of town?
Ellyn Derman	human health and environmental impact too risky
Elsa	Our families deserve a clean environment where children can play safely outside and families can live without exposure to contaminants
Emily Wolf	For too long my neighborhood and so many others, predominantly communities of color and low-income areas, have borne the brunt of polluting industries and decision makers treating them like sacrifice zones. I oppose this asphalt plant expansion in Santa Fe's Southside neighborhood and support the reversal of the Environmental Department's permit approval. I encourage our city to think creatively about city planning and protecting our neighborhoods.
emmy	the south side deserves better!
Eric Carlson	"Why is this not being placed in the middle of Las Campanas?"
Estefani Barrera	This shouldn't be In our community especially to close to schools and homes.
Gabriela Marquez Villegas	"I live in the area, my children attend the schools in the area and I know there are many young people that will be affected by the asphalt plan."
George and Dorothy Gamble	Please do not site contaminating industry in minority neighborhoods. This kind of action is totally discriminatory and has been done for 75 years or more. Do the right thing. Stop it.
Gertrude O'Toole	This is not good for a neighborhood's health.
Giselle Piburn	The current permit does NOT adequately addresses the human and environmental IMPACTS. Thank you for considering these south side communities.
Gustavo González	Asphalt Plant should be moved away from the city somewhere outside city limits

Hailey loya	Reverse the approval of the Consolidated Asphalt Plant Permit.
Hernan Gomez Chavez	We need housing not pollution on the Southside
Hilary Heyl	Do not approve this permit, it is environmentally dangerous.
Ibrahim Loeks	Please give due consideration to the concerns being presented. This doesn't make sense to put more industries that effect air quality next to schools and residential communities. Investing in the health and well being of communities should be our top priority as we continue to develop a sustainable future.
Ingrid chali	No es bueno para salud de todos los que vivimos en área es mucho lo que está en riesgo de contaminación
Isabel De Santiago	"Community first!"
JC Corcoran	Reject permit!
Jeff Hornstein	The Consolidated Asphalt Plant will endanger the health of people living near it and it is bad for the environment. Please reverse the approval of the permit.
Jennifer Johnson	Please support the health of all Santa Fe residents.
Jennifer Spring	We can find a better way to take care of our transportation needs. Community Health is more important than convenience.
Jeri Cheney	Please reverse the approval of the Consolidated Asphalt Plant
Jessamyn Young	It is no accident that toxic industries are located in neighborhoods of color, the very definition of environmental racism. We are fighting the same thing in Albuquerque
Jessi Fuchs	This country always puts its most harmful, polluting plants in the backyards of those most susceptible to illness and long term morbidities. For the health and wellbeing of those who live on the Southside, please keep the asphalt plant out of our community. We deserve clean air just like the rest of the city and county.
Jill Marie Lynch	<p>Asphalt needs to be regulated and its use limited. Asphalt is hazard to our health and needs to be taken seriously. I cannot imagine working with asphalt for my job, I cannot even be near it when applied at a public parking lot or in front of a business, I get so sick. See link from NIOSH/CDC. https://www.cdc.gov/niosh/docs/2001-110/pdfs/2001-110.pdf</p> <p>It is imperative to keep close watch on asphalt, its use (overuse) and asphalt on increasingly heated up times is unwise for continued/future use.</p> <p>Health and safety for all, including the air quality.</p> <p>Jill Marie</p>

Jim Cruz	It will be too loud, too unsightly, and will increase traffic. There is already too much equipment noise early in the morning.
Jo Fisher	Reverse this disaster!
Joanie Puma Bennet	Soon there will be no green space to save! Thank you!
Joey Schultz	Protect our precious community and the air we breath.
John Garcia	I don't think having this in our area is a good idea at all. I do not want it in my area.
Joie Peña	We need to stop pollution and protect the environment.
Joni Arends	I will be submitting written public comments.
Joseph Treat	A terrible thing to build around people living there
Joseph W. Brownrigg	This is a community of human beings. We need clean air and quiet space. We are not in the more affluent section of Santa Fe, but are subject to extra-ordinary incursions to our livelihood. Therefore, I oppose this application and endorse the reversal of the earlier, misdirected decision to allow this invasion of our lives.
Judy Goldberg	We must insist upon upholding the highest environmental and health standards and compliance first and foremost. Allowing industry to proceed without due diligence is criminal. To proceed in under-resourced communities, unconscionable.
Juliana Herrera	We don't want any more junk on our lungs.
Karen Bonime	Children need clean air. Asphalt plants do not belong near schools. Air pollution affects children and elderly people more strongly than adults . As a retired teacher, I have seen firsthand the impacts of asthma on children's learning and well-being. Air pollution causes an increase in asthma attacks. This is also an environmental justice issue - Why are largely Hispanic neighborhoods being targeted with the increased pollution of an asphalt plant? Please say NO to this project!
Karen Meador	"I am concerned about the increase in the production of toxic hydrocarbon emissions in its day to day operations and the impact on the health of many Santa Feans who have lung and asthma conditions. This is especially concerning with the continuing covid-19 presence and its impact on lungs as well."
Kathryn Ugoretz	Please consider the serious health issues—esp for children's growing bodies
Katy Medley	Please protect our neighborhoods full of children and schools. No asphalt plant expansion and increased pollution on Santa Fe's Southside!!
Ken Hughes	"The location of the proposed plant is the worst siting for particulate matter pollution movement into the center of Santa Fe and surrounding neighborhoods. The plan for this plant must be properly vetted for air pollution, noise and community impacts. The current location is not acceptable."
Kenneth	Clean air Southside!

Johnson	
Kristie Neslen	I used to live on the South side and it is a vibrant and diverse community with people of all ages, including children, and with varying levels of health. South sides deserve a clean, healthy environment.
KRISTIN SLEICHER	This will pollute the entire area, and is absolutely WRONG.
Laura Hitt	I oppose the expansion of the asphalt plant on the Southside. It will negatively impact both the environment and the community.
LB	I support the local communities concerns about the environmental impact of this plant.
Leah Yngve	It is not acceptable to subject members of our community to poor air quality and a degraded environment near their homes, especially given the proximity of the plant to more vulnerable members of our community and the long history of environmental racism. We have to protect and listen to our community!
Leslie Lakind	Pls stop this project
liana sonne	no expansion of the plant please
Lileigh	No comment, full support of reversing the approval
Linda Booth	This is so inappropriate for neighborhoods with residents and schools. Who in their right mind thinks this is okay? Come on, Santa Fe. People will move away because of this.
LISA B OPPENHEIMER	Please reverse the approval of this permit. An asphalt plant will destroy the quality of life for members of the surrounding community. .
Lorenzo Ramirez	I live in the area and i and my family would be directly impacted by the negative effects of the pollution caused by this asphalt plant.
Lucia Duncan	I believe in the precautionary principle when making decisions that could harm human health, especially in neighborhoods where people are already overexposed to environmental hazards.
Lynne Gaffikin	It is imperative that we keep dense urban areas especially near schools free from industry that could potentially harm both physical and mental health. It is also unjust to burden these areas that contain high numbers of youth, low-income, and immigrant families.
Madeline Hart-Andersen	The south side is routinely forgotten and often deliberately overlooked in discussions about liveability in Santa Fe. Please take our concerns about environmental affects seriously. We matter. Our children matter.
Margaret Acton	Please STOP!
Maria Cruz	My family lives 1 mile from this proposed facility, and we are very concerned about the air quality, smells, and noise and traffic it will bring.
Maria Meyer	People before profit. Not the other way around.

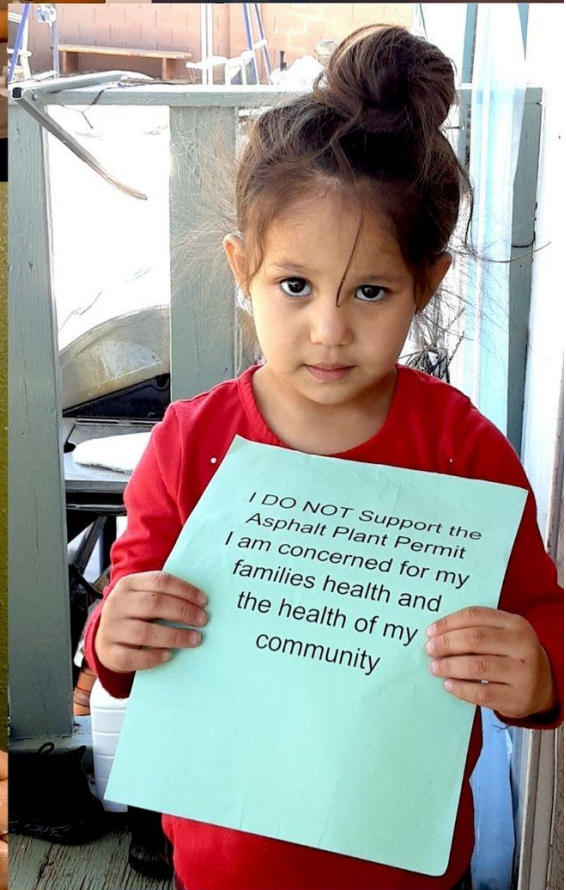

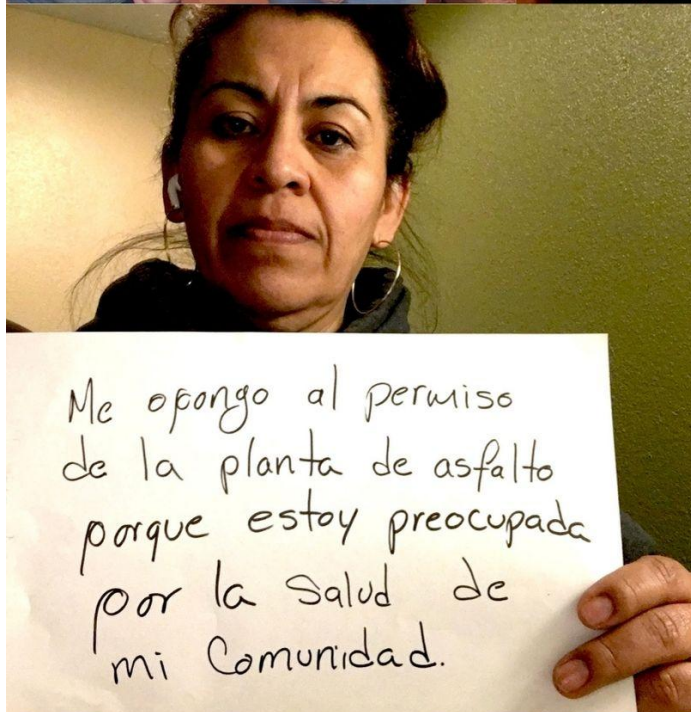

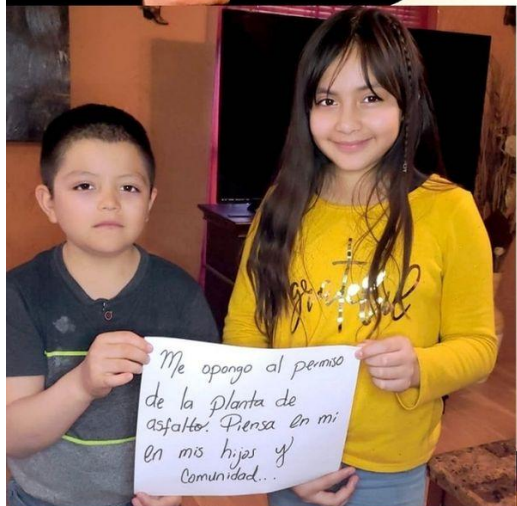

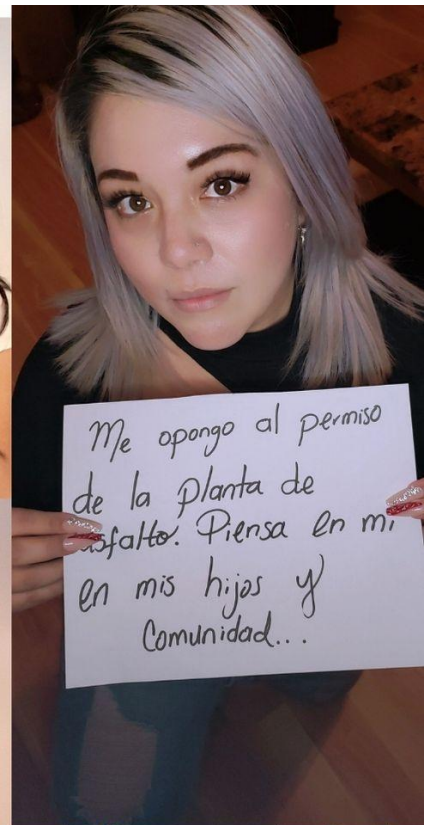

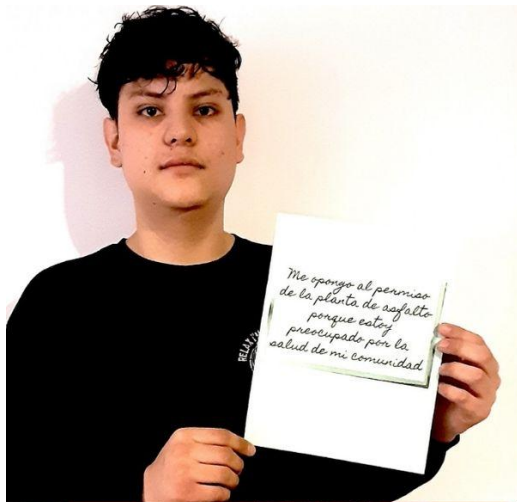

Mario Garcia	The planet needs more trees less asphalt.
Mark young	Children in school should not be exposed to the smell and toxic fumes emitted by such a plant
Marlow Morrison	Why does a project that pollutes the air and lowers quality of life need to be placed in an area with established neighborhoods so close? Quality of life and public health needs to be on the forefront of this decision.
Marty (Martha) Carvlin	Please reverse the approval of the Consolidated Asphalt Plant Permit.
Mary Ellen B Gonzales	It is unfair to subject the population to these unhealthy air pollutants
Mary M Neikirk	I oppose the consolidation of the two asphalt plants. The new plant will emit noxious gases, dirt, and residue. It is particularly disturbing that the plant affects low-income and minority neighborhoods.
Matthew Young	For the health of current generations and future generations living on the South Side of Santa Fe AND for the health of the incredible juniper rangeland environment that surrounds Santa Fe's South Side, please reverse this asphalt plant's permit approval!
Melissa Houser	You have a chance as a Board to leave a legacy of standing up for underserved people. Please choose to reverse the permit approval.
Michael Francis Lewitke	Not the kind of development the "City Different" needs.
Michael Francis Lewitke	If Santa Fe is to remain the "City Different", a more careful process must be used when deciding what industries can be located where.
Michael Meade	Please oppose the permit to allow construction of asphalt processing plant.
Michaela Gallegos	Reverse the permit to persevere the air quality
Mikiko Ellis	Please consider the community first.
Nalia Kast	I am signing this petition in the hopes of stopping the asphalt plant expansion in Santa Fe's Southside neighborhood, which is a clear example of following profitable endeavors at the expense of people's health, safety, and wellbeing.
Nancy robles	Tener una mejor conservación
Nanette Elizabeth Phillips	We oppose the approval to consolidate the asphalt plant!
Naomi Swinton	Please reverse this approval.
Nelson Denman	No Asphalt plant! No to environmental pollution!

Nodiah Brent	No more environmental racism. No more insults to the health of our citizens.
Nohemy Bojorquez-Flores	No more pollution please.
Nomi Green	No to the new permit.
Norma cross	Very bad idea, I do not support this.
Pamela Marshall	<p>How many times do we have to tell you? The PEOPLE say NO to this operation. Stop environmental pollution and health degradation . STOP sacrificing minority community health with polluting plants. The people living in the area and the schools do not want this cement operation located there. When are you going to Respect and Regard people abs their health and living environment over corporate \$\$. Our government. Out voice. Listen , Respect and Honor.</p> <p>Pamela ‘Canyonrivers’ Marshall</p>
Pamela Moreno	Thank you for keeping our community safe and healthy
Paul Mallory	The approval of the Consolidated Asphalt Plant needs to be reversed due to the cost to the environment.
Paul Shank	Stop polluting!
Pedro Luis Ontiveros	I don’t want my family to get sick.
Pedro Ontiveros	Please HELP
Rachel Wixom	Please do the right thing and take care of our community.
Randy Barron	"My daughter and grand-children live very near the proposed site, and their health and happiness will suffer if this plant is built."
René Laubach	This area is of historical significance
Renee Villarreal	I urge the Environmental Improvement Board to reconsider this permit. I do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards.
Reverie de Escobedo	I am appalled that yet another thing is happening that will be detrimental to the south side
Rhea Serna	The EIB needs to acknowledge the harmful impact that this asphalt plant will have on members of our community. The value of someone's life should not be measured by the value of their home or property.
Rich Schrader	Thank you for this opportunity to comment on this environmental justice issue!

Richard Moore	Environmental Justice Now!! Los Jardines Institute
Richard Welker	I share all of the concerns mentioned in the petition but especially those regarding the environmental racism impacts on childrens lungs.
Roberto Aponte	A plant like this should not be close to neighborhoods and communities where people live.
roberto sanchez	"The plant should be relocated outside of Santa Fe city where there is not traffic,."
Ron seifert	CAP is crap! Doom to this permit!
Rosa A	"NO a la planta de asfalto. Si al aire limpio. Queremos a nuestra comunidad sin más contaminación"
Rosangela Rogers	I feel that for too long now the City of Santa Fe and the State of New Mexico have neglected the Southside members of the community by allowing pollutants, crowding, and other environmental issues to harm our children, adults, and elderly. We have no open spaces, we lack a grocery store nearby, we lack the appreciation of those in power. We are only seen when we need to vote. We are being treated as lesser than others who live in privileged communities in this city. I would like to see trees planted along Airport Road, parks for our children, and a sense of belonging that is non existent currently. We pay taxes, we want our children to live in a healthy environment. I appreciate your consideration. Sincerely,
Ruth Ramos	Do the right thing - reverse the Permit approval
Sally Maxwell	Reverse the permit approval now! This is appalling. We cannot have this pollution impacting our youth, our elderly, and everyone in between.
Sandra Guajardo Torres	Pues porque Santa Fe está creciendo mucho y nuestros niños y jóvenes están cerca del lugar que quieren construir por seguridad de ellos y los vecindarios que están alrededor lo pueden hacer en las orillas donde no esté tan poco poblado. Es mi opinión gracias.
Sara Franco	Nuestro Santa fe es una ciudad santuario en toda la extensión de la palabra. Esta planta sería muy dañina a nuestra ciudad ya que nuestro cielo es de los más limpios del país. Y así lo queremos conservar.
Sara Gmitter	this plant would be unhealthy for the neighborhood and the families that live there
Sara Hume	This plant is far too close to residential areas - the Southside is the heart of working class Santa Fe, not a sacrifice zone!
Sarah Stout	I do not agree with the consolidated asphalt plant permit for many reasons including use of water and environmental consequences. It is another example of putting an environmentally damaging situation near where people with less means and often people of color live and attend school. Clean air and use of the land space for trails and outdoor endeavors promotes a healthy community. Thank you.
Sasha McGhee	I oppose the consolidation of the asphalt plant and the increased air pollution, right near our homes and parks

Selma Gutierrez	No more pollution in vulnerable communities!!!
Shannon Palermo	I stand in solidarity with families & students that will be impacted by this project. I oppose the Asphalt Plant merger.
Shari Griswold	We don't need more pollution and noise in Santa Fe.
Siriaadi	People have a right to breathe clean air and sleep at night.
Sofia Martinez	Stop the permit.
Steve Harvath	All too often the burden of living and going to school near air polluting industries falls on the least fortunate of our society. They need their voices and concerns addressed.
Susan and Roger Peirce	The city and county of Santa Fe and the southern neighborhoods in particular will be adversely affected by the particulates from an asphalt facility so close to town. Moreover, why does it have to run 24/7 7 days a week? The traffic and noise it generates directly impacts the surrounding neighborhoods. We need to start cleaning up toxic industries and not encourage their expansion. Our air used to be rated among the top in the country; no longer and it's due to increased particulates, exactly what this plant would be spewing 24/7.
Susan Schuurman	NMED needs to stop targeting low-income communities of color with the most polluting industries. This is environmental racism and it must be disrupted.
Terry Carlin	At this time in human history we should all be concerned about any facility that contributes further to the degradation of our air quality and other resources necessary for the health of individuals and the planet in general.
Valerie Joe	Consolidating the asphalt plant operations will increase pollution in this area that already has many industrial uses. Please overturn the asphalt plant consolidation permit to not increase the pollution that is produced on the Southside of Santa Fe where many families live. Thank you for considering this point of view.
Veronica Toledo	Please reverse the approval of the Consolidated Asphalt Plant Permit
Victoria	No asphalt plant in low income neighborhoods is an equity issue.
William Ferguson	Environmental Justice for the Southside!
Zulema Chavero	"I care about my children and community. We deserve a good and healthy place to leave like anyone else."

2. COMMUNITY PETITION

We residents of the impacted neighborhoods are concerned about the negative impacts this large operation will have on air quality; noise and vehicle traffic on public roads; that it will degrade natural beauty and quality of life for residents; exacerbate public health issues; and threaten wildlife, historic structures, tourism, water quality, water conservation, and property values.

Nosotros , los residentes de los vecindarios afectados, estamos preocupados por los impactos negativos que tendrá esta gran operación en la calidad del aire; ruido y tráfico de vehículos en la vía pública; que degradará la belleza natural y la calidad de vida de los residentes; empeorará los problemas de salud pública; y será una amenaza a la vida silvestre, las estructuras históricas, el turismo, la calidad del agua, la conservación del agua y el valor de propiedad.

1) We are concerned because there are more polluting industries coming here, increasing the impact on our children's lungs.

Homes, parks, and schools may become full of harmful dust, fumes, and residue. | Estamos preocupados porque vienen más industrias contaminantes , aumentando el impacto en los pulmones de nuestros niños.

2) Homes, parks, and schools may become full of harmful dust, fumes, and residue. | Las casas, los parques y las escuelas pueden llenarse de polvo, humo y residuos nocivos.

3) We are concerned about environmental racism. More and more polluting businesses are coming to the Southside of Santa Fe. This is the most densely populated part of Santa Fe and is home to the greatest number of youth, low income, and immigrant families. | Nos preocupa el racismo ambiental. Más y más negocios contaminantes están llegando al Sur de Santa Fe. Esta es la parte más densamente poblada de Santa Fe y es el hogar de la mayor cantidad de jóvenes, familias inmigrantes y de bajos ingresos.

4) Our community is already the most impacted by COVID, and now we may see increased rates of asthma and other diseases in our children. | Nuestra comunidad ya es la más afectada por COVID, y ahora podemos ver mayores tasas de asma y otras enfermedades en nuestros niños.

5) We do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards. | No creemos que el permiso actual aborde adecuadamente las preocupaciones humanas y ambientales o los estándares actuales de la EPA.

6) We are concerned that the current operations of the company may not be compliant with air quality standards and that sufficient monitoring and oversight do not exist to protect our community's health. | Nos preocupa que las operaciones actuales de la compañía no cumplan con los estándares de calidad del aire y que suficiente monitoreo no exista.

7) Given the absence of this information, we are asking the EIB to reverse the permit approval because Associated Asphalt's operations have not been sufficiently monitored, compliance has not been proven based on appropriate standards, and the impacts to the community of the consolidated plant operation should be studied in the context of COVID-19 and cumulative air quality impacts in the area. | Dada la ausencia de esta información, estamos solicitando al EIB que revoque la aprobación del permiso porque las operaciones de Associated Asphalt no han sido suficientemente monitoreadas, no se ha probado el cumplimiento con base en estándares apropiados y los impactos a la comunidad de la operación de la planta consolidada deben ser estudiado en el contexto de COVID-19 y los impactos acumulados en la calidad del aire en el área.

8) We do not believe there was enough information nor data for the NMED to approve the Associated Asphalt plant's permit request | No creemos que haya suficiente información ni datos para que NMED apruebe la solicitud de permiso de la planta de Associated Asphalt.

We ask the Environmental Improvement Board to reverse the NMED's decision. | Le pedimos a la Junta de Mejoramiento Ambiental que revoque la decisión del NMED.

SIGNATURES COLLECTED IN PERSON

These petition signatures were collected by students who attend elementary schools in the neighborhood where the Asphalt plant consolidation will be located as well as through door-to-door canvassing in the immediate area.

Petition in support of Appeal to NM Environmental Improvement Board of New Mexico Environmental Department pollution permit

Environmental Improvement Board Administrator
New Mexico Environment Department Harold Runnels Building
P.O. Box 5469 Santa Fe, NM 87502

To: Board Administrator at public.facilitation@state.nm.us
CC: Pamela.Jones@state.nm.us

Subject: Public Comments, Petition, and Photos for Docket No. EIB 21-48

Dear Honorable Hearing Officer,

Earth Care is a community-based, member-led organization on Santa Fe's Southside. We have over 4,000 members and supporters.

Through door-to-door canvassing, neighborhood meetings, notices, and presentations in schools, we worked to inform our members and community of the proposed expansion and air quality permit sought by the Associated Asphalt and Materials LLC from the New Mexico Environmental Department last year. We supported our members' and community's participation in the NMED public hearing process. Our members and community have continued to stay engaged.

We are submitting a number of documents that have been prepared by our members and community expressing their support for the Appeal before you as well as their testimony. The community is clearly asking for the reversal of the NMED decision and reconsideration based on appropriate air quality standards and data.

Attached please find:

- 1) Over 200 comments and testimonials submitted by members and residents, including children who attend schools in the area, who wanted their voices to be included in this hearing process and who expect their concerns to be considered before you make your decision.
- 2) Attached please also find a community petition signed (online or in-person) by 596 Santa Fe residents, the vast majority of whom live in the immediate impacted area.

Please accept this public testimony as part of the official record of the case.

Thank you,

Domenica Nieto
Environmental Justice Organizer
Earth Care

1.COMMUNITY COMMENTS & TESTIMONY

- 3rd-grade students at El Camino Real Academy.	“Some people think that because we live on the Southside, we don’t have enough money and that we don’t have a strong enough voice. They wouldn’t build this Asphalt Plant downtown because those people would fight against it. We can fight back on the southside too!”
Jazmín Rodriguez Lopez	As a young person living in the Southside of Santa Fe I am asking the Environmental Improvement Board to reverse the NMED’s decision.
Seneca Johnson	Our community members deserve to live long and healthy lives and to know that those who come after us will have that same opportunity. Adding more polluting sources near our neighborhoods, schools, and parks doesn't support healthy lives or a healthy community, and we demand better.
Elena Valdez	I am a mother of a toddler and a runner. I want my child and the other children of our neighborhood to breathe clean air when they are outside. I want my community to be able to enjoy the little access we have to trails and open space on the Southside without worrying about how the air might affect their health. Why do companies and our local government always devalue the health, safety, and joy of people who reside on the predominantly working class side of Santa Fe?
Rosario H Torres	I have been a volunteer at a Southside school for over 8 years. I am very familiar with the health, income, housing, and overall disparities affecting the neighborhoods in this part of town. I oppose this permit as it is clear that our health and well being are at stake with this expansion.
Mary Ann Maestas	There needs to be better air protections and monitoring of pollutants. The current permit doesn't address our human and environmental concerns or the current EPA standards. Sufficient monitoring and oversight do not exist to protect our community's health. Several community members spoke up in early 2020 regarding smells and fumes from the plant in their nearby offices but there was no follow up or inspection of the plant. This may be due to lack of resources of NMED but it cannot be appropriate for this and not giving enough information and data to the community.
Rebecca Smith	I am very concerned about the decision to grant an air pollution permit to Associated Asphalt and Materials, LLC. Not only was the permit issued in violation of EPA guidelines but the decision is also a blatant example of environmental racism as the Southside of Santa Fe is home to the greatest number of youth, low-income, and immigrant families. Prioritizing this company over the health of our community members is disgraceful. Please reverse this decision!
Yessenia Sanchez	Tengo miedo al foco de contaminación , miedo por mis hijos y por todos los niños que vivimos y las demás familias , NO ESTOY DE ACUERDO.

siento enojada porque están tratando de hacer
una fábrica cerca de nuestra escuela. Y
los niños se pueden enfermar si los niños
lo respiran.

My name is **Kimberly Aparicio**, I am 17 years old and attend Capital High School, I live at 4129 south meadows. I learned from a family member about Associated Asphalt and Materials' permit application and it created anger and fear in me. Anger because why do we have to have it on our side of town, why not downtown? Fear because how will our city look like with so much air pollution? I am testifying here today in opposition to the permit application before you. I would be directly impacted because I live nearby . I have lived here my entire life and would hate to see that happen. My school is also nearby. The real question is how wouldn't it affect me or my sisters and brothers and parents or a family member who lives close by in Cottonwood or Riverside. With this asphalt plant being so close we could face health problems, people in my family have Asthma. My greater concerns are that my little cousins would have to go to a school with this bad air pollution. My family member, like my mom, works near there and so does my dad.

I would like to ask those responsible, or to anyone who will be making the decision, do any of the people proposing live nearby on the south side of Santa Fe? Do your children attend any schools there? How would you feel about a situation like this. How is this fair to us? Is it because we are the lower income area of the city or because we are the side with the immigrant community. This is not fair that we have to deal with this all day, all night every day. How will our city look in a year with all this pollution? Who will be affected by this. Most certainly not you who probably don't live here. We already have so many things on our side of town like the sewage plant that we have to deal with, why do we have to deal with more. Please, to you who will be making a choice I ask you to deny the permit. This will be bad for our health and bad for our community. I want you to treat me with the same respect as the people in downtown Santa Fe. Your priority is to keep us safe and prevent more health issues. We are already dealing with COVID-19. Invest in a healthy, more safe community. Invest in more teen centers in our area.

Maria Guadalupe 2500 S Meadows Rd, Santa Fe, NM 87507 vivimos un poquito cerca de la planta. Temo por mis hijos. I have 4 kids ages 12,10,8,6. El mayor tiene asma. Temo perder a mis hijos. La concentración de las plantas nos afectará en forma negativa. Sin saber si fuimos infectados por COVID, cómo podemos saber el impacto de la contaminación de esta planta junto con las demás industrias que se han colocado ahí. En seguida están las canchas de fútbol. Como pueden poner estas industrias en donde nuestros hijos van a jugar. Deberían de poner un parque mejor.

Good evening Hearing Examiner. My name is **Alejandra Bojorquez** 37 Reata Rd. Santa Fe NM. Soy una niña y tengo 9 años. Vivo con mi mama, mi papa y mi hermano de 8 años. No quiero que aprueben el permiso para la planta porque puede afectarnos a las personas y a los animales. Yo y mi familia podemos respirar el humo. Queremos más arboles y parques, más tiendas y actividades para niños.

Gabriela Marquez Villegas 1449 Zepol Rd Apt 101 Santa Fe NM 87507 I live on the south side of Santa Fe, and work at El Camino Real Academy in Santa Fe. My children also go to school in the area. I live with my husband, my brother in Law, my daughter and my son. My children are 10 and 19 years old. My daughter attends El Camino Real Academy and my son studies at Santa Fe Community College. We all have allergies to environmental factors, there is also high blood pressure in the family and after COVID exposure, various types of respiratory problems. I'm a teacher, and one of my coworkers shared his environmental concerns with his students, including my daughter, who was invited to a meeting with Earthcare. She and I learned so much about all the things we can do to protect our communities and our health. The NMED had as their obligation to attend to the environmental needs of the people, and as public servants it is their obligation to protect the well being of the people they represent, and we should be protected equally. Any decision should be made with the community, imposing decisions is not democracy. Democracy is representative of the people and their interests, taking into consideration what we want and need. All the students in our local schools are your citizens and it's your obligation to protect them too. We don't need more contamination. We need community centers to develop a healthy community, parks, green areas, libraries, sidewalks, public transportation and affordable housing. The multicultural characteristics of the population in the area are vast and rich. We have the basis to develop a great variety of food, art, furniture and other artisanal goods. A market with multicultural elements would be rich and viable to help Santa Fe culture, language and the economy. A community Center with a library, opportunities for physical activities and garden to plant and grow food. We need solar energy and sustainable resources, economy and inclusive education and culture. This is an opportunity for the state agencies to listen and hear what we need. If what we are requesting is not listened to the environmental, social and economical consequences will be so much more expensive for agencies, the losses of people would be irreparable.

<https://drive.google.com/open?id=1n-jcOg29a92GCWoaIuVP1PSsFV-aEkXx>

Priscila Marquez 2500 S Meadows Rd, Santa Fe, NM Tengo 10 años y vivo cerca de la escuela El Camino Real Academy. Esta planta de asfalto va a afectar todo, mi salud, y la de mi mamá, mi papá, y mi hermana. Yo tengo 9 años y participo en esta campaña con mis compañeros de la escuela El Camino Real Academy. Esta planta va a poner en riesgo la salud de todos los niños y adultos jóvenes, todo el aire va estar contaminado y vamos a crecer en un ambiente contaminado. Está en peligro la salud de nuestros abuelos, papas y de los animales. Yo y mi familia queremos estar sanos, con salud, por eso no queremos esa planta que van a expandir.87507.<https://drive.google.com/open?id=16MQtq6PB7TvKb8Ek72qJQb7c4ogLVUxF>

Emy Meraz 2500 S Meadows Rd, Santa Fe,NM 87507 Soy Emy, tengo 9 años, y mi maestra en 21 century nos habló de la planta y hablamos del mal que nos puede hacer por eso yo no quiero la planta de asfalto cerca de mi casa ni de mi escuela. Totalmente va a afectar mi salud, va a afectar como crezco y va a afectar a mi comunidad. Vivo cerca de la escuela Camino Real Academy, en el sur de la ciudad de Santa Fe, junto con mi mamá, mi papá, 2 hermanas, 2 hermanos, y mis tíos. Mis papás se preocupan porque temen que nos vayamos a enfermar, tal vez

morir, que la contaminación nos haga mucho daño. Por favor, no aprueben el permiso. Queremos aire fresco y limpio, que nos pongan más parques, más árboles y plantas, y lugares en donde los niños puedan jugar.

<https://drive.google.com/open?id=1jmaUgdRpWT5qO1PdUIUx4X7Uvfzk1ham>

Gabriela Rodriguez 1449 Zepol Rd. Apt 101 Santa Fe NM 87507. Hi! I am Gabriela Rodriguez. I am 11 years old and I go to school at El Camino Real. I live nearby with my mom, my dad, and my brother. Our family suffers from allergies and some also have heart problems. I got involved in this campaign because I care about our health and I want us to have a good future. This plant could give us asthma and breathing problems, that is my biggest concern. I want them to not build the plant and to instead make a new park or plant more trees. We want to be treated better instead of them only thinking of the money and not our health. Instead of the plant we want more parks and trees.

<https://drive.google.com/open?id=1UNNGH0XZ55Hpghmk1WFFyLZLfJlh6VV9w>

Miriam Luevano 3832 Riverside Dr. Mi nombre es Miriam Luevano. Soy maestra y madre de familia. Cuando me di cuenta de esta situación por la organización de Earth Care, empecé a involucrarme. Esta planta, y la consolidación, me afectaría ya que vivo muy cerca del lugar donde la pondrían. Pondría a mis dos hijos en riesgo. Mi hija tiene 10 y mi hijo 7 y van a la Cesar Chavez Elementary. Mi hijo tiene asma y temo que esto empeorará su salud. Esto puede afectar el desarrollo de mis hijos y mi comunidad. Me preocupa la salud de mis seres queridos. Me gustaría que se pusieran en mis zapatos, porque me imagino que a ellos no les gustaría que sus hijos vivieran en un lugar en donde el medio ambiente se respira tóxico. Me gustaría que se me tomara en cuenta tanto a mi como a mi comunidad. Quiero un ambiente limpio, libre de plantas tóxicas. Quiero centros de aprendizaje, parques y áreas para caminar seguras y alumbradas. Por favor escuchen nuestras palabras! Tomen en consideración la salud de mi familia y mi comunidad!

https://drive.google.com/open?id=1YNW_NmsPLb3pHr5JukVWBzltxcJHIGW9

Janinne Garbalena 3832 Riverside Tengo 10 años, estoy en la Cesar Chavez y vivo cerca de la planta junto con mi mamá y mi hermano de 7 años. Esta fábrica me afectaría en mi salud. Mi mamá me ha enseñado de la naturaleza y del lugar en donde estamos viendo. También nos enseña de la salud y cómo vivir bien. Estas fábricas van a afectar a nuestra comunidad también. Queremos cosas bonitas y positivas mejor. Más respeto y felicidad.

https://drive.google.com/open?id=1-Nl8Jb1V9WaIfGUT_AC4oSiqPZ5YyBpG

Samantha Gonzalez Ramirez Tengo 10 años y soy alumna de la escuela de El Camino Real. Vivo cerca de la escuela con mi mamá, mi papá, y mi hermano. En Guatemala viven dos hermanas, y un hermano. Esta fábrica va a contaminar el aire, va a contaminar todo. A mí me preocupa que nos podamos morir por toda la contaminación que hay en el mundo pero lo podemos recuperar si ya no tiramos basura y mejor reciclamos, y si niegan los permisos a plantas como esta. En la escuela me dicen que haga cosas buenas por mi salud y por la tierra. Esta planta

no es buena, lo que quiero es que planten más árboles y más plantas nutritivas. Mi familia y yo queremos salvar el planeta. El gobierno debería de querer lo mismo.

<https://drive.google.com/open?id=1KiGVZWSCfxjQaut7KlwnvltSE4ZjkhsK>

Stephany Marquez 1004 Calle Don Roberto, Santa Fe, NM, 87507 Personally I will be directly impacted because I live nearby this proposed plant. Not only will it affect my health, but since my brother will also be attending El Camino Real next year it will affect his health as well. My dad, brother, and myself live in my house. No one in my family has health issues. My name is Stephany Marquez and I am 16 years old. Currently I am a Sophomore at Tierra Encantada charter school. I have always been interested in overall environmental topics, since my cousin was in this community group she invited me to join which is how I became involved with this campaign. My greatest concerns would have to be for everyone's health. like I have been mentioning before. I would tell the decision-makers to deny the permit because it will have more negative impact rather than positive ones. I want the Environmental Department and decision-makers to treat my community when making decisions like this would probably take all aspects into consideration. Like; health, lifestyle, the impacts it will make either positive/negative, etc. I really want a clean and fresh environment for my family. Some things I would like to have in my neighborhood would probably be a cleaner environment. For example, I live close to the acequias park and even though it is clean, making some upgrades would make it a better environment. Some business opportunities I would rather have for my community would probably be things that are positive for the environment. Like helping plant trees or working in support of different groups that will help our community. Some community development projects I would rather have would be career and college based training and education <https://drive.google.com/open?id=17SNbW5HcUPf9oTZV2CzOUyyRsWEuA15c>

Maria Martinez 2742 Sycamore Loop, Mi nombre es Maria Martinez y mi participación en esta campaña es por mis hijos, mi familia y mi comunidad. Esta planta nos afectará demasiado ya que vivimos cerca y mi hijo asiste a la escuela Camino Real. En nuestra comunidad no tenemos parques, no tenemos biblioteca, no hay tiendas para comprar comida, ni espacios para recrearnos. Pero lo que sí hay son demasiadas industrias que contaminan el aire y afectan nuestras vidas. Yo les pediría que tomen conciencia de todo el daño que ocasiona a los habitantes que viven cerca y sobre todo a todos los niños que asisten a la escuela, a las mujeres embarazadas cuánto daño les haría respirar ese aire contaminado, las personas mayores. Ya lo dije anteriormente y en pocas palabras que nieguen ese permiso y piensen en su familia si estuvieran viviendo ahí cerca.

<https://drive.google.com/open?id=1vNKP8x7rm7ykLFB4cXi9Oic1ceiIdS9c>

Patricia Chillon Garcia 6333 Paseo del Sol West. My name is Patricia Chillon-Garcia. I am a sixth-grade teacher at El Camino Real Academy and my 5-year-old daughter is a student at this school. I am attending the community meetings of the Earth Care organization and as soon as I found out about the situation and location of the asphalt plant, I wanted to take measures above all to protect our children and families in the South Santa Fe area. Families in which I include myself since this is the community in which I also live. I live in the southern part of Santa Fe and

I am directly affected by the construction of the plant. In this neighborhood there are many families with young children and also older retirees. My husband also has asthma and will be impacted. In my classes, we have done an investigation to understand the impact that the toxic substances contained in asphalt gases (hydrogen sulfide, sulfur dioxide, carbon monoxide, nitrogen oxides, arsenic, benzene and cadmium and solvents such as toluene, xylene, and naphtha, as well as styrene, asbestos, and silica) have on people's health and the results have left us very alarmed and concerned since the effects include serious respiratory ailments, headaches, itchy throat and eyes, rashes, dizziness, fatigue, poor appetite, and even cancer, especially if there is an overexposure to these gases. We are very concerned about the proximity of the plant and the fact that it is going to operate 24 hours a day. We wonder if the relevant studies have been made of the impact that these gases have on the environment and on people and if an exhaustive study has been made of safety and of the distance that these plants should have with respect to population centers. We understand that asphalt is an important material but we are concerned that the relevant studies have not been carried out on the impact of this plant on the environment and on the health of the communities that are close to this plant. In addition, we consider that the reduced distance between this plant and the areas of public use, neighborhood communities, and school facilities is not being taken into account. Those of us who live in this area can smell the gases from the La Bajada mine and that is at a greater distance than the one planned for the asphalt plant. La prioridad de las autoridades debería ser la salud y el bienestar de los núcleos de población y el evitar el impacto negativo que este tipo de plantas tiene en las personas y en el medio ambiente intentando mitigar o eliminar sus efectos dañinos y seriamente perjudiciales para la salud. Queremos que haya un trato igualitario, equitativo entre comunidades. Al igual que está fuera de lugar poner una planta cerca de El Dorado o el centro de la ciudad, debería estar fuera de lugar construirla cerca de una comunidad creciente como es la de la Zona Sur. Más aún a sabiendas de que muchas de las personas que viven en esta comunidad no tienen aseguranzas de salud. Por otro lado nos hubiera gustado que nuestra comunidad hubiera sido informada de la manera que corresponde en estos casos. El protocolo dice que al momento que se presenta la petición tiene que haber un informe bilingüe a la comunidad y un aviso previo de 30 días. Queremos un medioambiente sano y limpio. Queremos equidad, queremos que se respete la comunidad del sur y que se tenga en cuenta que esta comunidad del sur está creciendo y que es una zona con muchas escuelas que hay que respetar como el resto de las comunidades de nuestra bella Santa Fe. Creemos que la ubicación de esta planta promueve el racismo medioambiental y que es hora de replantearse la planificación industrial de la ciudad, es hora de un “rezoning” de la zona industrial. Queremos que haya un estudio fiable y exhaustivo del impacto que tienen en el medio ambiente y en la población este tipo de fábricas. Queremos embellecer y potenciar esta zona de la ciudad y promover un espacio seguro para todas las familias que viven aquí y para los jóvenes y para las generaciones futuras. We want a clean and healthy environment. We want equity, we want the southern community to be respected, and to take into account that this southern community is growing and that it is an area with many schools that must be respected as the rest of Queremos negocios que den oportunidades de trabajo pero que sean negocios saludables y seguros que respeten el medioambiente. We want businesses that provide job opportunities but are healthy and safe businesses that respect the environment. Centros

comunitarios, más parques, más zonas de recreación, etc. Community centers, more parks, more recreation areas, etc. Una pregunta, si ya hay una planta de asfalto, para qué hacerla más grande y contaminante. One question, if there is already an asphalt plant, why make it bigger and more polluting.

My name is **Esteban Aguilar** and I live close to the south side of Santa Fe, and work as a Real Estate Agent with Equity New Mexico in Santa Fe, New Mexico. I went to school in this area and my older child also went to school in the area. I live with my wife and my younger son. My children are 25 and 16 years old. My older son attended Sweeney Elementary, Ortiz Middle School, and Capitol High school, and my 16 year old son went to Cecar Chavez Elementary and now studies at Santa Fe Community College, in the Master's Program.. We all have allergies to environmental factors, and my wife has had various types of respiratory problems in the past. I'm a Realtor, and some of my clients have shared with me their environmental concerns about how this will greatly impact the value of their homes, and how this can also bring a deficit to their families, this is including my two sons, who know I'm involved with Earthcare. Them and I learned so much about all the things we can do to protect our communities and our health. The NMED has as their obligation to attend to the environmental needs of the people, and as public servants it is their obligation to protect the well being of the people they represent, and we should be protected equally. Any decision should be made with the community, imposing decisions is not democracy. Democracy is representative of the people and their interests, taking into consideration what we want and need. All the students in our local schools are your citizens and it's your obligation to protect them too. We don't need more contamination. We need community centers to develop a healthy community, parks, green areas, libraries, sidewalks, public transportation and affordable housing. The multicultural characteristics of the population in the area are vast and rich. We have the basis to develop a great variety of food, art, furniture and other artisanal goods. A market with multicultural elements would be rich and viable to help Santa Fe culture, language and the economy. A community Center with a library, opportunities for physical activities and garden to plant and grow food. We need solar energy and sustainable resources, economy and inclusive education and culture. This is an opportunity for the state agencies to listen and hear what we need. If what we are requesting is not listened to the environmental, social and economical consequences will be so much more expensive for agencies, the losses of people would be irreparable.

Isabel de Santiago: I live in Santa Fe N.M. and have several loved ones that live on the southside of Santa Fe. I recently learned of an asphalt plant that is wanting to create business in that area. As a healthcare professional, I am concerned of my loved ones well being. There is plenty of space elsewhere to create this type of business, away from any community. Why is it that plants like these always want to create business in low income areas?

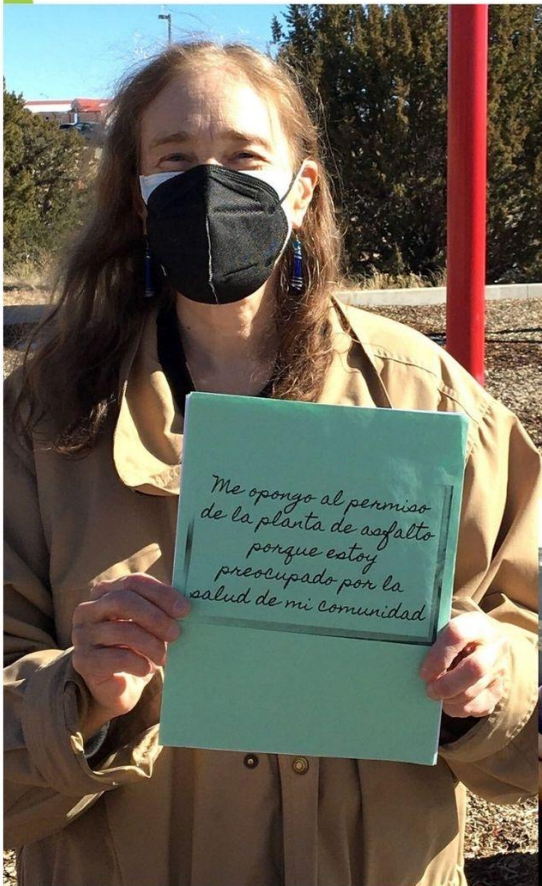

I know that around that area there is an assisted living/memory care facility where the elderly will be affected by the toxic air pollutants that this plant will create. There are schools in that area as well, where children will also be affected by the pollution created by this asphalt plant. The NMED had an obligation to protect equally regardless. These type of decisions should be

revised, carefully considering the harm these businesses will bring to the community and the burden it will bring to the state once we see community members becoming ill due to the many toxins brought upon them. It is time for the state to listen to the needs of this community and to think of the harm this asphalt plant will bring in the long run. It is time to think of the expenses that will pile up on the state due to an asphalt plant that could have created business elsewhere. If this plant already has business in New Mexico why does it want to expand more and why does it want to build in a community where many will suffer from the toxins they will bring? I heard that it is because the owner has a dream, what about the children in that community that also have many dreams and they could be shattered due to the many illnesses the asphalt plant will cause? It is my knowledge that these asphalt plants can cause central nervous system issues, cancer, asthma/respiratory issues, skin irritation and more. It is time to think of the people in this community!

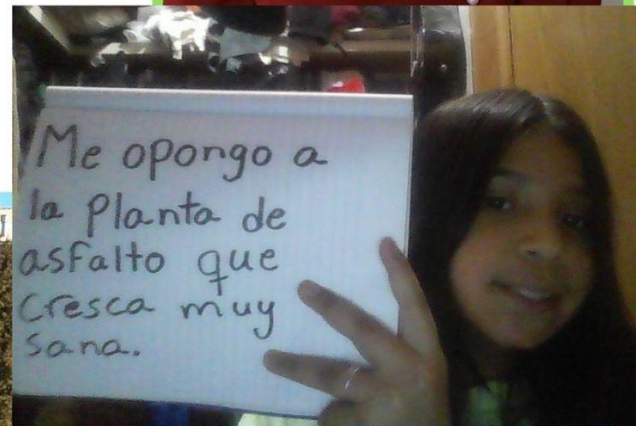

My name is **Selma Gutierrez** and I am representative of the Santa Fe Mutual Aid. A network of residents in Santa Fe County that have been providing support to one another during the COVID-19 crisis. I am here to represent the many members of the network who reside in the airport road neighborhoods. The majority of our 1300 members live in the Airport road corridor. Throughout history and throughout many cities, people of color and marginalized communities have been taken advantage of and not accounted for. We are repeating history if we follow through with this permit without adequate information about the health impacts. In the New Mexican news article “company holds meeting to address concerns on asphalt plant” that only around 70 people came to this meeting. That does not cover not even a fourth of the community's population. This information is not being reached to the right areas and many of these community members are not being accounted for. We have shared information through the network and the overall sentiment of residents extreme concern. You might know that the southside of Santa Fe in area code 87507 has been one of the areas hardest hit by the pandemic. Their health is at risk and they are not even aware of all of the details of this proposal. As a member of the community and having always lived on the south side of Santa Fe, I am here to be their voice and ask you to deny this permit until the company can prove that residents in the area who already have asthma, allergies, or COVID will not be adversely affected. Thank you for your time.

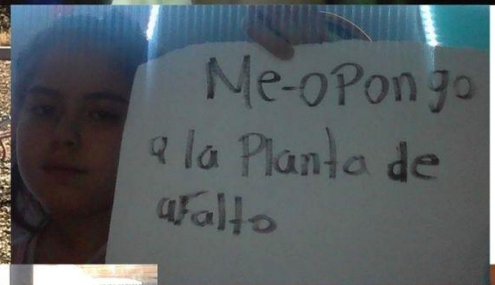

**No quiero la planta
de asfalto, quiero
árboles y crecer
sana.**

*Me opongo al permiso
de la planta de asfalto
porque estoy
preocupado por la
salud de mi comunidad*

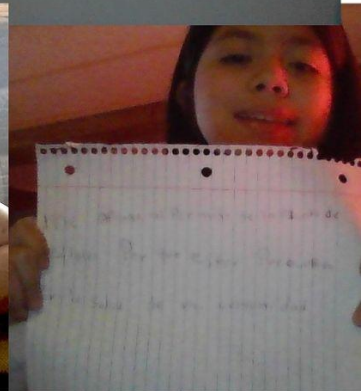

*Me opongo a
la planta de
asfalto que
crezca muy
sana.*

*Me-oPongo
a la Planta de
asfalto*

**I DO NOT Support the
Asphalt Plant Permit
I am concerned for my
families health and
the health of my
community**

Allison Fabara	Please reverse the approval of the Consolidated Asphalt plant permit.
Amber Anastasion	We do not want factories on the south side of Santa Fe. We are concerned that it will negatively impact the air quality and pollute the environment. This factory is close to schools and neighborhoods.
Amy Jo Christian	Our city must address the concerns coming from local families and put a stop to allowing toxic industries to pollute and endanger our neighborhoods. Say NO to the asphalt plant - it is not safe for our air or water and allowing it is blatant environmental racism.
Analicia Guitron	We should be protecting our children more than the corporations.
Angie Walker	Bring parks and sidewalks to the Southside, not polluting industries.
Arin Dineen	This is so important for our neighborhood!
Artemisio Romero y Carver	The constant placement of pollutant industry near ghettoized and minoritized populations constitutes cold genocide.
Ashley Zappe	Santa Fe has wonderful air quality so far. Please do not approve further pollution!
Aviva Hirsch	We do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards.
Bette N Evans	Please do not continue to pollute Santa Fe, particularly the South Side!
Bev Hedin	Please do Reverse this Asphalt Plant permit, New Mexico people deserve clean air & environment!
Bianca Sopoci-Belknap	Please hold the Environment department accountable for applying the most up-to-date standards to protect our air and our health. Thank you!
Bob Alei	Move it up to Aldea or Las Campanas
Brenda Bailey-White	As a former reviewer for National Environmental Policy Act (NEPA) compliance, I know all too well that the least harmful action is not always chosen, despite informed public input. Working in Albuquerque, I am also aware that the major air polluter of our city is a facility to the east, similar in nature to the Santa Fe operations in question. I stand in solidarity with my Santa Fe neighbors who demand consistent air quality monitoring and point source testing. This the Climate Emergency public involvement that New Mexico needs and deserves. Leadership and regulatory response should be no less diligent. Thank you for the opportunity to provide comments.
Brenda E. Euwer	stop with your dirty factoreis - killing us- figure it out - clean it up or go away.
Brett Davis	"I live on the Southside and want to fight to protect it -- discussions of our beautiful "City Different" often overlook the Southside."
Bruce Willson	It is too close to schools and houses
Byron Gross	"I believe there should be equality in how communities are treated in Santa Fe. There is plenty of open space far from adjacent communities where the asphalt plan could be

	located."
Carly	I live on the south side and I was concerned to that this could cause an increase in air pollution
Carol I Johnson	The approval of the Consolidated Asphalt Plant Permit needs to be reversed until the impact on air quality on the health of community residents can be determined.
Castille Aguilar	I am deeply concerned for our community's health and safety. Not only should we not continue to sacrifice our low income and people of color, but especially our young people. We should not continue with this project, with the consideration of our community's health and voices.
Catherine Yow	Everyone deserves a place to live, work, play, worship, EXIST safely Fuel our present and future generations of people to be able to have a safe place and have the nature of their area be able to stay intact and not be encroached upon by this potential asphalt plant This especially applies to the blatant environmental racism of this potential asphalt plant that will disproportionately and directly harm communities of color, lower income residence areas, and communities with a significant portion of immigrants.
CHERYL D ODOM	Stop dumping everything no one else wants on the Southside!
Chloe	Although I do not live in the area that this proposed assault expansion would directly affect, I am part of the Santa Fe community. It is the duty of the community; including those who already approved this, to protect one another and everyone's human right to a clean environment. This proposed expansion could be very harmful to the community members who are living and going to school in this area and takes away their human right to a clean/healthy environment.
Christopher Chappell	As someone with a chronic health issue related to human pollution, I think it's horrific that this permit has been approved so close to so many people and neighborhoods. It is a blatant example of environmental racism and classism, given that this is the lowest income area of Santa Fe with a high percentage of POC. Please reverse this permit decision for the health and well being of the residents of Santa Fe County.
Cipriana Jurado Herrera	No más contaminación en nuestras tierras.
Clifton Bain	The air pollution impacts of this are detrimental to the health abd welfare of the people who live, work and visit this neighborhood
Cretel Cortez barrita	Esto está contaminando nuestra ciudad tan bonita que tenemos me opongo rotundamente no más contaminación para la ciudad de santa fe
D Tsewang	Lets protect our community's vulnerable health. Thank you
Daniel Piburn	We must stop forcing our communities to endure environmental and other harms to

	advance, profit-over-people business models. Thank you
Daniel Ramirez Vargas	Es dañino para el area en la que vivimos
David F Garcia	protect the environment for everyone and thing.
Deborah Reade	This asphalt plant will pollute the local neighborhood. This kind of industry should never be permitted where people live and work and where children go to school. Plus, the public process for the permit for this facility was defective and discriminatory and should be completely re-done so the voices of all affected people can be heard.
Deirdre Downs	"If you ever wonder if this kind of thing is okay, just imagine if the same asphalt plant was being planned for the East side of town... smh in disgust."
Denise Silva	I agree that the plant would have a negative effect on our natural resources, and would present pervasive health risks to the city of Santa Fe, in particular the south side. This is yet another example of how the health of lower-income people are disregarded.
dixmarie deLaneuville	Be better. Do better.
Don Hyde	Please reverse the permit approval for this asphalt plant.
Donald Murray	reverse the decision. do not grant a permit
Dora Maria Campos	Contaminsria el medio ambiente
Douglas Belknap	Too much industrial air pollution possible affecting largely residential area/schools. Young people's lungs are much more vulnerable to pollutants, too.
Earnest Keiser	This is a capital city not an industrial waste zone. Protect our children and the environment buy denying all industrial permits within the city and the county. Other communities need the development and the jobs.
Eden Radfarr	NMED needs to take social and environmental justice seriously - please reverse their decision that was harmful to both
Elaine Cimino	NO Asphalt Plant No more bad planning projects No more disparate impacts No more approvals without considering GHGEs
Eleanor Bravo	No to asphalt plant permit
Elena Gonzales	Please reverse the permit approval - for our future and our health! Apply the appropriate EPA standards and use the data from current emissions
Elena Sopoci	"Santa Fe's air quality is so much better than much of the rest of the country - this kind of assault on air quality has no place near homes and schools. Also the noise and traffic would be very disruptive. Why do poor people have to bear the brunt of polluters?"

Elena Valdez	I am a mother of a toddler and a runner. I want my child and the other children of our neighborhoods to breath clean air when they are outside. I want my community to be able to enjoy the little access we have to trails and open space on the Southside without worrying about how the air might affect their health. Why do companies and our local government always devalue the health, safety, and joy of people who reside on the predominantly working class side of Santa Fe?
Elise Fagan	"I support the youth of Santa Fe. They should not have to live and attend school next to an asphalt plant."
Elizabeth	Me preocupa la salud de mis hijos y de mi familia. Y de toda la comunidad en general.
Ella	This plant poses major concerns to public health and safety of the communities in the area. Especially the many kids who are living, going to school, and playing in the area.
Ellen Ackerman	Do we really want to increase environmental racism in Santa Fe? How about siting this plant on the north or east side of town?
Ellyn Derman	human health and environmental impact too risky
Elsa	Our families deserve a clean environment where children can play safely outside and families can live without exposure to contaminants
Emily Wolf	For too long my neighborhood and so many others, predominantly communities of color and low-income areas, have borne the brunt of polluting industries and decision makers treating them like sacrifice zones. I oppose this asphalt plant expansion in Santa Fe's Southside neighborhood and support the reversal of the Environmental Department's permit approval. I encourage our city to think creatively about city planning and protecting our neighborhoods.
emmy	the south side deserves better!
Eric Carlson	"Why is this not being placed in the middle of Las Campanas?"
Estefani Barrera	This shouldn't be In our community especially to close to schools and homes.
Gabriela Marquez Villegas	"I live in the area, my children attend the schools in the area and I know there are many young people that will be affected by the asphalt plan."
George and Dorothy Gamble	Please do not site contaminating industry in minority neighborhoods. This kind of action is totally discriminatory and has been done for 75 years or more. Do the right thing. Stop it.
Gertrude O'Toole	This is not good for a neighborhood's health.
Giselle Piburn	The current permit does NOT adequately addresses the human and environmental IMPACTS. Thank you for considering these south side communities.
Gustavo González	Asphalt Plant should be moved away from the city somewhere outside city limits

Hailey loya	Reverse the approval of the Consolidated Asphalt Plant Permit.
Hernan Gomez Chavez	We need housing not pollution on the Southside
Hilary Heyl	Do not approve this permit, it is environmentally dangerous.
Ibrahim Loeks	Please give due consideration to the concerns being presented. This doesn't make sense to put more industries that effect air quality next to schools and residential communities. Investing in the health and well being of communities should be our top priority as we continue to develop a sustainable future.
Ingrid chali	No es bueno para salud de todos los que vivimos en área es mucho lo que está en riesgo de contaminación
Isabel De Santiago	"Community first!"
JC Corcoran	Reject permit!
Jeff Hornstein	The Consolidated Asphalt Plant will endanger the health of people living near it and it is bad for the environment. Please reverse the approval of the permit.
Jennifer Johnson	Please support the health of all Santa Fe residents.
Jennifer Spring	We can find a better way to take care of our transportation needs. Community Health is more important than convenience.
Jeri Cheney	Please reverse the approval of the Consolidated Asphalt Plant
Jessamyn Young	It is no accident that toxic industries are located in neighborhoods of color, the very definition of environmental racism. We are fighting the same thing in Albuquerque
Jessi Fuchs	This country always puts its most harmful, polluting plants in the backyards of those most susceptible to illness and long term morbidities. For the health and wellbeing of those who live on the Southside, please keep the asphalt plant out of our community. We deserve clean air just like the rest of the city and county.
Jill Marie Lynch	<p>Asphalt needs to be regulated and its use limited. Asphalt is hazard to our health and needs to be taken seriously. I cannot imagine working with asphalt for my job, I cannot even be near it when applied at a public parking lot or in front of a business, I get so sick. See link from NIOSH/CDC. https://www.cdc.gov/niosh/docs/2001-110/pdfs/2001-110.pdf</p> <p>It is imperative to keep close watch on asphalt, its use (overuse) and asphalt on increasingly heated up times is unwise for continued/future use.</p> <p>Health and safety for all, including the air quality.</p> <p>Jill Marie</p>

Jim Cruz	It will be too loud, too unsightly, and will increase traffic. There is already too much equipment noise early in the morning.
Jo Fisher	Reverse this disaster!
Joanie Puma Bennet	Soon there will be no green space to save! Thank you!
Joey Schultz	Protect our precious community and the air we breath.
John Garcia	I don't think having this in our area is a good idea at all. I do not want it in my area.
Joie Peña	We need to stop pollution and protect the environment.
Joni Arends	I will be submitting written public comments.
Joseph Treat	A terrible thing to build around people living there
Joseph W. Brownrigg	This is a community of human beings. We need clean air and quiet space. We are not in the more affluent section of Santa Fe, but are subject to extra-ordinary incursions to our livelihood. Therefore, I oppose this application and endorse the reversal of the earlier, misdirected decision to allow this invasion of our lives.
Judy Goldberg	We must insist upon upholding the highest environmental and health standards and compliance first and foremost. Allowing industry to proceed without due diligence is criminal. To proceed in under-resourced communities, unconscionable.
Juliana Herrera	We don't want any more junk on our lungs.
Karen Bonime	Children need clean air. Asphalt plants do not belong near schools. Air pollution affects children and elderly people more strongly than adults . As a retired teacher, I have seen firsthand the impacts of asthma on children's learning and well-being. Air pollution causes an increase in asthma attacks. This is also an environmental justice issue - Why are largely Hispanic neighborhoods being targeted with the increased pollution of an asphalt plant? Please say NO to this project!
Karen Meador	"I am concerned about the increase in the production of toxic hydrocarbon emissions in its day to day operations and the impact on the health of many Santa Feans who have lung and asthma conditions. This is especially concerning with the continuing covid-19 presence and its impact on lungs as well."
Kathryn Ugoretz	Please consider the serious health issues—esp for children's growing bodies
Katy Medley	Please protect our neighborhoods full of children and schools. No asphalt plant expansion and increased pollution on Santa Fe's Southside!!
Ken Hughes	"The location of the proposed plant is the worst siting for particulate matter pollution movement into the center of Santa Fe and surrounding neighborhoods. The plan for this plant must be properly vetted for air pollution, noise and community impacts. The current location is not acceptable."
Kenneth	Clean air Southside!

Johnson	
Kristie Neslen	I used to live on the South side and it is a vibrant and diverse community with people of all ages, including children, and with varying levels of health. South sides deserve a clean, healthy environment.
KRISTIN SLEICHER	This will pollute the entire area, and is absolutely WRONG.
Laura Hitt	I oppose the expansion of the asphalt plant on the Southside. It will negatively impact both the environment and the community.
LB	I support the local communities concerns about the environmental impact of this plant.
Leah Yngve	It is not acceptable to subject members of our community to poor air quality and a degraded environment near their homes, especially given the proximity of the plant to more vulnerable members of our community and the long history of environmental racism. We have to protect and listen to our community!
Leslie Lakind	Pls stop this project
liana sonne	no expansion of the plant please
Lileigh	No comment, full support of reversing the approval
Linda Booth	This is so inappropriate for neighborhoods with residents and schools. Who in their right mind thinks this is okay? Come on, Santa Fe. People will move away because of this.
LISA B OPPENHEIMER	Please reverse the approval of this permit. An asphalt plant will destroy the quality of life for members of the surrounding community. .
Lorenzo Ramirez	I live in the area and i and my family would be directly impacted by the negative effects of the pollution caused by this asphalt plant.
Lucia Duncan	I believe in the precautionary principle when making decisions that could harm human health, especially in neighborhoods where people are already overexposed to environmental hazards.
Lynne Gaffikin	It is imperative that we keep dense urban areas especially near schools free from industry that could potentially harm both physical and mental health. It is also unjust to burden these areas that contain high numbers of youth, low-income, and immigrant families.
Madeline Hart-Andersen	The south side is routinely forgotten and often deliberately overlooked in discussions about liveability in Santa Fe. Please take our concerns about environmental affects seriously. We matter. Our children matter.
Margaret Acton	Please STOP!
Maria Cruz	My family lives 1 mile from this proposed facility, and we are very concerned about the air quality, smells, and noise and traffic it will bring.
Maria Meyer	People before profit. Not the other way around.

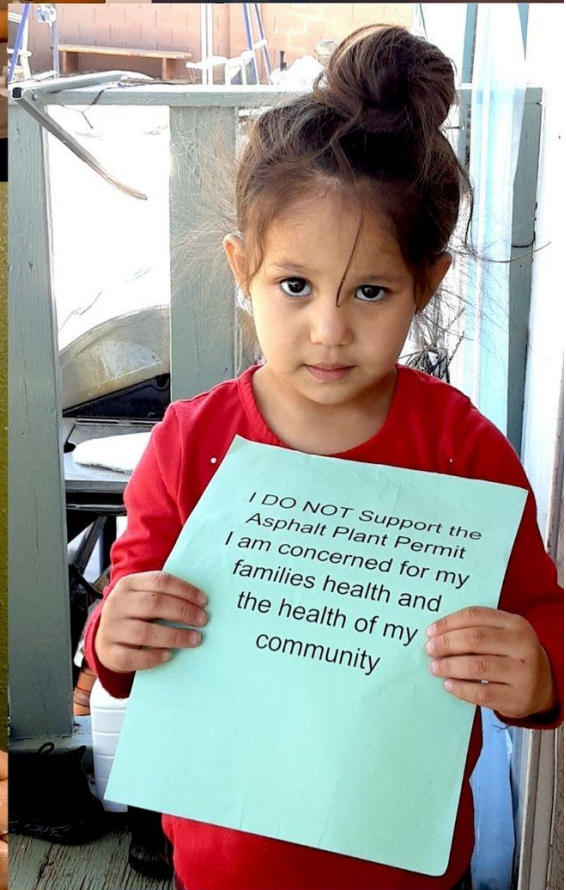

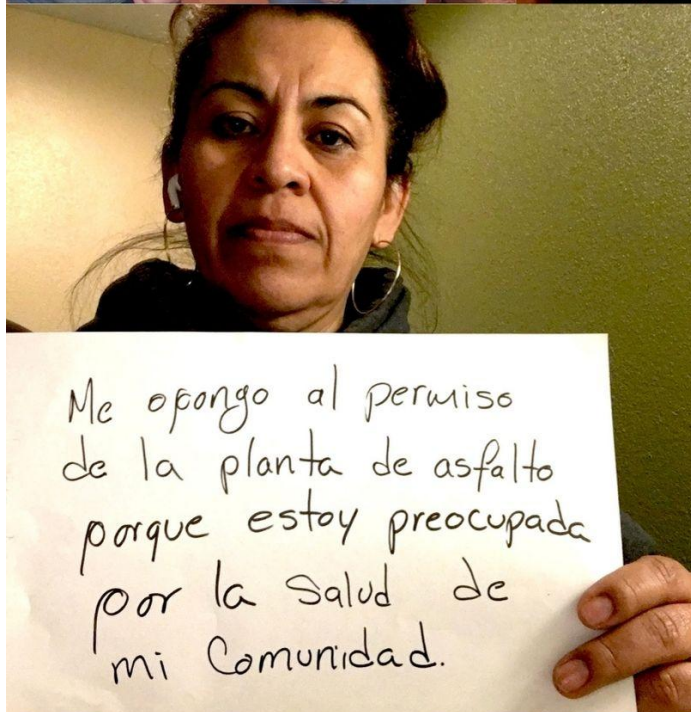

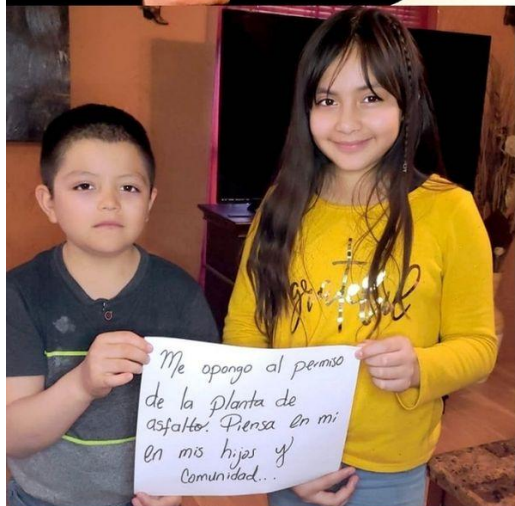

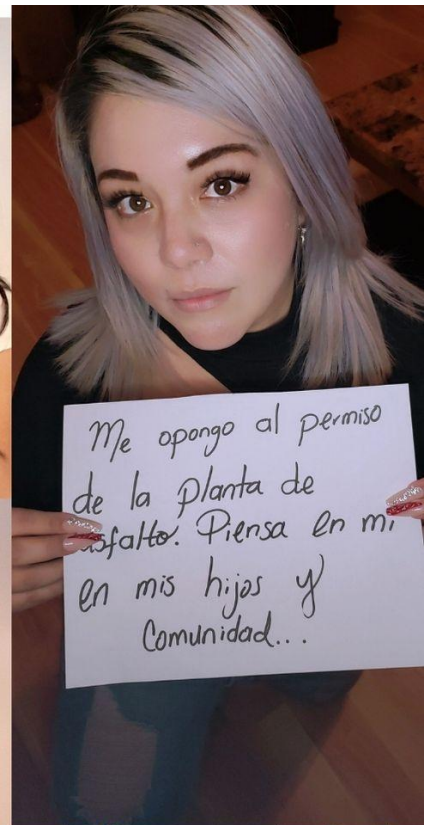

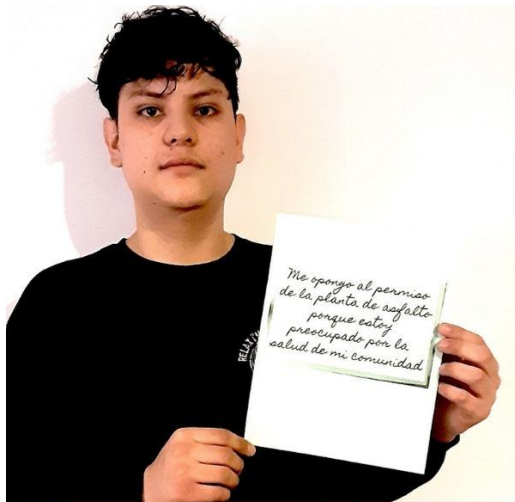

Mario Garcia	The planet needs more trees less asphalt.
Mark young	Children in school should not be exposed to the smell and toxic fumes emitted by such a plant
Marlow Morrison	Why does a project that pollutes the air and lowers quality of life need to be placed in an area with established neighborhoods so close? Quality of life and public health needs to be on the forefront of this decision.
Marty (Martha) Carvlin	Please reverse the approval of the Consolidated Asphalt Plant Permit.
Mary Ellen B Gonzales	It is unfair to subject the population to these unhealthy air pollutants
Mary M Neikirk	I oppose the consolidation of the two asphalt plants. The new plant will emit noxious gases, dirt, and residue. It is particularly disturbing that the plant affects low-income and minority neighborhoods.
Matthew Young	For the health of current generations and future generations living on the South Side of Santa Fe AND for the health of the incredible juniper rangeland environment that surrounds Santa Fe's South Side, please reverse this asphalt plant's permit approval!
Melissa Houser	You have a chance as a Board to leave a legacy of standing up for underserved people. Please choose to reverse the permit approval.
Michael Francis Lewitke	Not the kind of development the "City Different" needs.
Michael Francis Lewitke	If Santa Fe is to remain the "City Different", a more careful process must be used when deciding what industries can be located where.
Michael Meade	Please oppose the permit to allow construction of asphalt processing plant.
Michaela Gallegos	Reverse the permit to persevere the air quality
Mikiko Ellis	Please consider the community first.
Nalia Kast	I am signing this petition in the hopes of stopping the asphalt plant expansion in Santa Fe's Southside neighborhood, which is a clear example of following profitable endeavors at the expense of people's health, safety, and wellbeing.
Nancy robles	Tener una mejor conservación
Nanette Elizabeth Phillips	We oppose the approval to consolidate the asphalt plant!
Naomi Swinton	Please reverse this approval.
Nelson Denman	No Asphalt plant! No to environmental pollution!

Nodiah Brent	No more environmental racism. No more insults to the health of our citizens.
Nohemy Bojorquez-Flores	No more pollution please.
Nomi Green	No to the new permit.
Norma cross	Very bad idea, I do not support this.
Pamela Marshall	<p>How many times do we have to tell you? The PEOPLE say NO to this operation. Stop environmental pollution and health degradation . STOP sacrificing minority community health with polluting plants. The people living in the area and the schools do not want this cement operation located there. When are you going to Respect and Regard people abs their health and living environment over corporate \$\$. Our government. Out voice. Listen , Respect and Honor.</p> <p>Pamela ‘Canyonrivers’ Marshall</p>
Pamela Moreno	Thank you for keeping our community safe and healthy
Paul Mallory	The approval of the Consolidated Asphalt Plant needs to be reversed due to the cost to the environment.
Paul Shank	Stop polluting!
Pedro Luis Ontiveros	I don’t want my family to get sick.
Pedro Ontiveros	Please HELP
Rachel Wixom	Please do the right thing and take care of our community.
Randy Barron	"My daughter and grand-children live very near the proposed site, and their health and happiness will suffer if this plant is built."
René Laubach	This area is of historical significance
Renee Villarreal	I urge the Environmental Improvement Board to reconsider this permit. I do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards.
Reverie de Escobedo	I am appalled that yet another thing is happening that will be detrimental to the south side
Rhea Serna	The EIB needs to acknowledge the harmful impact that this asphalt plant will have on members of our community. The value of someone's life should not be measured by the value of their home or property.
Rich Schrader	Thank you for this opportunity to comment on this environmental justice issue!

Richard Moore	Environmental Justice Now!! Los Jardines Institute
Richard Welker	I share all of the concerns mentioned in the petition but especially those regarding the environmental racism impacts on childrens lungs.
Roberto Aponte	A plant like this should not be close to neighborhoods and communities where people live.
roberto sanchez	"The plant should be relocated outside of Santa Fe city where there is not traffic,."
Ron seifert	CAP is crap! Doom to this permit!
Rosa A	"NO a la planta de asfalto. Si al aire limpio. Queremos a nuestra comunidad sin más contaminación"
Rosangela Rogers	I feel that for too long now the City of Santa Fe and the State of New Mexico have neglected the Southside members of the community by allowing pollutants, crowding, and other environmental issues to harm our children, adults, and elderly. We have no open spaces, we lack a grocery store nearby, we lack the appreciation of those in power. We are only seen when we need to vote. We are being treated as lesser than others who live in privileged communities in this city. I would like to see trees planted along Airport Road, parks for our children, and a sense of belonging that is non existent currently. We pay taxes, we want our children to live in a healthy environment. I appreciate your consideration. Sincerely,
Ruth Ramos	Do the right thing - reverse the Permit approval
Sally Maxwell	Reverse the permit approval now! This is appalling. We cannot have this pollution impacting our youth, our elderly, and everyone in between.
Sandra Guajardo Torres	Pues porque Santa Fe está creciendo mucho y nuestros niños y jóvenes están cerca del lugar que quieren construir por seguridad de ellos y los vecindarios que están alrededor lo pueden hacer en las orillas donde no esté tan poco poblado. Es mi opinión gracias.
Sara Franco	Nuestro Santa fe es una ciudad santuario en toda la extensión de la palabra. Esta planta sería muy dañina a nuestra ciudad ya que nuestro cielo es de los más limpios del país. Y así lo queremos conservar.
Sara Gmitter	this plant would be unhealthy for the neighborhood and the families that live there
Sara Hume	This plant is far too close to residential areas - the Southside is the heart of working class Santa Fe, not a sacrifice zone!
Sarah Stout	I do not agree with the consolidated asphalt plant permit for many reasons including use of water and environmental consequences. It is another example of putting an environmentally damaging situation near where people with less means and often people of color live and attend school. Clean air and use of the land space for trails and outdoor endeavors promotes a healthy community. Thank you.
Sasha McGhee	I oppose the consolidation of the asphalt plant and the increased air pollution, right near our homes and parks

Selma Gutierrez	No more pollution in vulnerable communities!!!
Shannon Palermo	I stand in solidarity with families & students that will be impacted by this project. I oppose the Asphalt Plant merger.
Shari Griswold	We don't need more pollution and noise in Santa Fe.
Siriaadi	People have a right to breathe clean air and sleep at night.
Sofia Martinez	Stop the permit.
Steve Harvath	All too often the burden of living and going to school near air polluting industries falls on the least fortunate of our society. They need their voices and concerns addressed.
Susan and Roger Peirce	The city and county of Santa Fe and the southern neighborhoods in particular will be adversely affected by the particulates from an asphalt facility so close to town. Moreover, why does it have to run 24/7 7 days a week? The traffic and noise it generates directly impacts the surrounding neighborhoods. We need to start cleaning up toxic industries and not encourage their expansion. Our air used to be rated among the top in the country; no longer and it's due to increased particulates, exactly what this plant would be spewing 24/7.
Susan Schuurman	NMED needs to stop targeting low-income communities of color with the most polluting industries. This is environmental racism and it must be disrupted.
Terry Carlin	At this time in human history we should all be concerned about any facility that contributes further to the degradation of our air quality and other resources necessary for the health of individuals and the planet in general.
Valerie Joe	Consolidating the asphalt plant operations will increase pollution in this area that already has many industrial uses. Please overturn the asphalt plant consolidation permit to not increase the pollution that is produced on the Southside of Santa Fe where many families live. Thank you for considering this point of view.
Veronica Toledo	Please reverse the approval of the Consolidated Asphalt Plant Permit
Victoria	No asphalt plant in low income neighborhoods is an equity issue.
William Ferguson	Environmental Justice for the Southside!
Zulema Chavero	"I care about my children and community. We deserve a good and healthy place to leave like anyone else."

2. COMMUNITY PETITION

We residents of the impacted neighborhoods are concerned about the negative impacts this large operation will have on air quality; noise and vehicle traffic on public roads; that it will degrade natural beauty and quality of life for residents; exacerbate public health issues; and threaten wildlife, historic structures, tourism, water quality, water conservation, and property values.

Nosotros , los residentes de los vecindarios afectados, estamos preocupados por los impactos negativos que tendrá esta gran operación en la calidad del aire; ruido y tráfico de vehículos en la vía pública; que degradará la belleza natural y la calidad de vida de los residentes; empeorará los problemas de salud pública; y será una amenaza a la vida silvestre, las estructuras históricas, el turismo, la calidad del agua, la conservación del agua y el valor de propiedad.

1) We are concerned because there are more polluting industries coming here, increasing the impact on our children's lungs.

Homes, parks, and schools may become full of harmful dust, fumes, and residue. | Estamos preocupados porque vienen más industrias contaminantes , aumentando el impacto en los pulmones de nuestros niños.

2) Homes, parks, and schools may become full of harmful dust, fumes, and residue. | Las casas, los parques y las escuelas pueden llenarse de polvo, humo y residuos nocivos.

3) We are concerned about environmental racism. More and more polluting businesses are coming to the Southside of Santa Fe. This is the most densely populated part of Santa Fe and is home to the greatest number of youth, low income, and immigrant families. | Nos preocupa el racismo ambiental. Más y más negocios contaminantes están llegando al Sur de Santa Fe. Esta es la parte más densamente poblada de Santa Fe y es el hogar de la mayor cantidad de jóvenes, familias inmigrantes y de bajos ingresos.

4) Our community is already the most impacted by COVID, and now we may see increased rates of asthma and other diseases in our children. | Nuestra comunidad ya es la más afectada por COVID, y ahora podemos ver mayores tasas de asma y otras enfermedades en nuestros niños.

5) We do not believe the current permit adequately addresses the human and environmental concerns or the current EPA standards. | No creemos que el permiso actual aborde adecuadamente las preocupaciones humanas y ambientales o los estándares actuales de la EPA.

6) We are concerned that the current operations of the company may not be compliant with air quality standards and that sufficient monitoring and oversight do not exist to protect our community's health. | Nos preocupa que las operaciones actuales de la compañía no cumplan con los estándares de calidad del aire y que suficiente monitoreo no exista.

7) Given the absence of this information, we are asking the EIB to reverse the permit approval because Associated Asphalt's operations have not been sufficiently monitored, compliance has not been proven based on appropriate standards, and the impacts to the community of the consolidated plant operation should be studied in the context of COVID-19 and cumulative air quality impacts in the area. | Dada la ausencia de esta información, estamos solicitando al EIB que revoque la aprobación del permiso porque las operaciones de Associated Asphalt no han sido suficientemente monitoreadas, no se ha probado el cumplimiento con base en estándares apropiados y los impactos a la comunidad de la operación de la planta consolidada deben ser estudiado en el contexto de COVID-19 y los impactos acumulados en la calidad del aire en el área.

8) We do not believe there was enough information nor data for the NMED to approve the Associated Asphalt plant's permit request | No creemos que haya suficiente información ni datos para que NMED apruebe la solicitud de permiso de la planta de Associated Asphalt.

We ask the Environmental Improvement Board to reverse the NMED's decision. | Le pedimos a la Junta de Mejoramiento Ambiental que revoque la decisión del NMED.

SIGNATURES COLLECTED IN PERSON

These petition signatures were collected by students who attend elementary schools in the neighborhood where the Asphalt plant consolidation will be located as well as through door-to-door canvassing in the immediate area.

Petition in support of Appeal to NM Environmental Improvement Board of New Mexico Environmental Department pollution permit

INDUSTRIAL STORMWATER

FACT SHEET SERIES

Sector D: Asphalt Paving and Roofing Materials Manufacturers and Lubricant Manufacturers

U.S. EPA Office of Water
EPA-833-F-06-019
February 2021

What is the NPDES stormwater permitting program for industrial activity?

Activities, such as material handling and storage, equipment maintenance and cleaning, industrial processing or other operations that occur at industrial facilities are often exposed to stormwater. The runoff from these areas may discharge pollutants directly into nearby waterbodies or indirectly via storm sewer systems, thereby degrading water quality.

In 1990, the U.S. Environmental Protection Agency (EPA) developed permitting regulations under the National Pollutant Discharge Elimination System (NPDES) to control stormwater discharges associated with eleven categories of industrial activity. As a result, NPDES permitting authorities, which may be either EPA or a state environmental agency, issue stormwater permits to control runoff from these industrial facilities.

What types of industrial facilities are required to obtain permit coverage?

This fact sheet discusses stormwater discharges from asphalt paving and roofing materials manufacturers and lubricant manufacturers as described by Standard Industrial Classification (SIC) Major Group 29. Only facilities that perform the following operations require coverage under an industrial stormwater permit:

- ◆ Asphalt paving mixtures and blocks (SIC 2951)
- ◆ Asphalt felts and coatings (SIC 2952)
- ◆ Lubricating oils and lubricating oils and greases (SIC 2992)
- ◆ Products of petroleum and coal not elsewhere classified (SIC 2999)

Not discussed in this fact sheet are renderers of fats and oils (see Fact Sheet U (EPA-833-F-06-036) for food and kindred products), oil recycling facilities (see Fact Sheet N (EPA-833-F-06-029) for scrap recycling facilities), or petroleum refining facilities.

What does an industrial stormwater permit require?

Common requirements for coverage under an industrial stormwater permit include development of a written stormwater pollution prevention plan (SWPPP), implementation of control measures, and submittal of a request for permit coverage, usually referred to as the Notice of Intent or NOI. The SWPPP is a written assessment of potential sources of pollutants in stormwater runoff and control measures that will be implemented at your facility to minimize the discharge of these pollutants in runoff from the site. These control measures include site-specific best management practices (BMPs), maintenance plans, inspections, employee training, and reporting. The procedures detailed in the SWPPP must be implemented by the facility and updated as necessary, with a copy of the SWPPP kept on-site. The industrial stormwater permit also requires collection of visual, analytical, and/or compliance monitoring data to determine the effectiveness of implemented BMPs. For more information on EPA's industrial stormwater permit and links to State stormwater permits, go to www.epa.gov/npdes/stormwater and click on "Industrial Activity."

What pollutants are associated with activities at my facility?

Pollutants conveyed in stormwater discharges from facilities involved with the manufacturing of asphalt, roofing materials, and lubricants will vary. There are a number of factors that influence to what extent industrial activities and significant materials can affect water quality.

- ◆ Geographic location
- ◆ Topography
- ◆ Hydrogeology
- ◆ Extent of impervious surfaces (e.g., concrete or asphalt)
- ◆ Type of ground cover (e.g., vegetation, crushed stone, or dirt)
- ◆ Outdoor activities (e.g., material storage, loading/unloading, vehicle maintenance)
- ◆ Size of the operation
- ◆ Type, duration, and intensity of precipitation events

The activities, pollutant sources, and pollutants detailed in Table 1 are commonly found at asphalt paving and roofing materials manufacturers and lubricant manufacturing facilities.

Table 1. Common Activities, Pollutant Sources, and Associated Pollutants at Asphalt Paving and Roofing Materials Manufacturers and Lubricant Manufacturing Facilities

Activity	Pollutant Source	Pollutant
<i>Asphalt Paving and Roofing Materials</i>		
Outdoor stockpiling of materials	Exposure of aggregate (sand, stone, limestone, gravel, etc.) to precipitation	Total suspended solids (TSS), total dissolved solids (TDS) biochemical oxygen demand (BOD5), chemical oxygen demand (COD), oil and grease (O&G), benzene, methylene blue active substances (MBAS), metals, pH
Storage of materials in above-ground tanks	Leakage from tanks	TSS, TDS, BOD5, COD, O&G, benzene, MBAS, metals, pH
Transport of materials by a conveyor or front-end loader	Exposed materials and potential spills	TSS, TDS, BOD5, COD, O&G, benzene, MBAS, metals, pH
<i>Lubricating Oils and Greases</i>		
Storage of raw materials	Spills and leaks of materials from tank farms or 55-gallon drums	Petroleum or synthetic-based stocks and various additives, O&G, pH
Vehicle and equipment maintenance	Parts cleaning, waste disposal of rags, oil filters, air filters, batteries, hydraulic fluids, transmission fluids, brake fluids, coolants, lubricants, degreasers, spent solvents	Gas/diesel fuel, fuel additives, oil/lubricants, heavy metals, brake fluids, transmission fluids, chlorinated solvents, arsenic
Vehicle and equipment fueling	Spills and leaks during fuel transfer, spills due to "topping off" tanks, runoff from fueling areas, washdown of fueling areas, leaking storage tanks, spills of oils, brake fluids, transmission fluids,	Gas/diesel fuel, fuel additives, oil, lubricants, heavy metals

Note: Activities may have additional pollutant sources that contain PFAS and can come into contact with stormwater discharges. Per- and polyfluoroalkyl substances (PFAS) are a group of man-made chemicals that include PFOA, PFOS, GenX, and many other chemicals.

What BMPs can be used to minimize contact between stormwater and potential pollutants at my facility?

A variety of BMP options may be applicable to eliminate or minimize the presence of pollutants in stormwater discharges from asphalt paving and roofing materials manufacturers and lubricant manufacturing facilities. You will likely need to implement a combination or suite of BMPs to address stormwater runoff at your facility. Your first consideration should be for pollution prevention BMPs,

which are designed to prevent or minimize pollutants from entering stormwater runoff and/or reduce the volume of stormwater requiring management. Prevention BMPs can include regular cleanup, collection and containment of debris in storage areas, and other housekeeping practices, spill control, and employee training. It may also be necessary to implement treatment BMPs, which are engineered structures intended to treat stormwater runoff and/or mitigate the effects of increased stormwater runoff peak rate, volume, and velocity. Treatment BMPs are generally more expensive to install and maintain and include oil-water separators, wet ponds, and proprietary filter devices.

BMPs must be selected and implemented to address the following:

Good Housekeeping Practices

Good housekeeping is a practical, cost-effective way to maintain a clean and orderly facility to prevent potential pollution sources from coming into contact with stormwater. It includes establishing protocols to reduce the possibility of mishandling materials or equipment and training employees in good housekeeping techniques. Common areas where good housekeeping practices should be followed include trash containers and adjacent areas, material storage areas, vehicle and equipment maintenance areas, and loading docks. Good housekeeping practices must include a schedule for regular pickup and disposal of garbage and waste materials and routine inspections of drums, tanks, and containers for leaks and structural conditions. Practices also include containing and covering garbage, waste materials, and debris. Involving employees in routine monitoring of housekeeping practices has proven to be an effective means of ensuring the continued implementation of these measures. Industrial facilities can conduct activities that use, store, manufacture, transfer, and/or dispose of PFAS containing materials. Successful good housekeeping practices to minimize PFAS exposure to stormwater could include inventorying the location, quantity, and method of storage; using properly designed storage and transfer techniques; providing secondary containment around chemical storage areas; and using proper techniques for cleaning or replacement of production systems or equipment.

Minimizing Exposure

Where feasible, minimizing exposure of potential pollutant sources to precipitation is an important control option. Minimizing exposure prevents pollutants, including debris, from coming into contact with precipitation and can reduce the need for BMPs to treat contaminated stormwater runoff. It can also prevent debris from being picked up by stormwater and carried into drains and surface waters. Examples of BMPs for exposure minimization include covering materials or activities with temporary structures (e.g., tarps) when wet weather is expected or moving materials or activities to existing or new permanent structures (e.g., buildings, silos, sheds). Even the simple practice of keeping a dumpster lid closed can be a very effective pollution prevention measure. Another example could include locating PFAS-containing materials and residues away from drainage pathways and surface waters.

Erosion and Sediment Control

BMPs must be selected and implemented to limit erosion on areas of your site that, due to topography, activities, soils, cover, materials, or other factors are likely to experience erosion. Erosion control BMPs such as seeding, mulching, and sodding prevent soil from becoming dislodged and should be considered first. Sediment control BMPs such as silt fences, sediment ponds, and stabilized entrances trap sediment after it has eroded. Sediment control BMPs should be used to back-up erosion control BMPs.

Management of Runoff

Your SWPPP must contain a narrative evaluation of the appropriateness of stormwater management practices that divert, infiltrate, reuse, or otherwise manage stormwater runoff so as to reduce the discharge of pollutants. Appropriate measures are highly site-specific, but may include, among others, vegetative swales, collection and reuse of stormwater, inlet controls, snow management, infiltration

devices, and wet retention measures. Incorporating treatment like granular activated carbon may be helpful to remove certain pollutants like PFAS.

A combination of preventive and treatment BMPs will yield the most effective stormwater management for minimizing the offsite discharge of pollutants via stormwater runoff. Though not specifically outlined in this fact sheet, BMPs must also address preventive maintenance records or logbooks, regular facility inspections, spill prevention and response, and employee training.

All BMPs require regular maintenance to function as intended. Some management measures have simple maintenance requirements, others are quite involved. You must regularly inspect all BMPs to ensure they are operating properly, including during runoff events. As soon as a problem is found, action to resolve it should be initiated immediately.

Implement BMPs, such as those listed below in Table 2 for the control of pollutants at asphalt paving and roofing materials manufacturers and lubricant manufacturing facilities, to minimize and prevent the discharge of pollutants in stormwater. Identifying weaknesses in current facility practices will aid the permittee in determining appropriate BMPs that will achieve a reduction in pollutant loadings. BMPs listed in Table 2 are broadly applicable to asphalt paving and roofing materials manufacturers and lubricant manufacturing facilities; however, this is not a complete list and you are recommended to consult with regulatory agencies or a stormwater engineer/consultant to identify appropriate BMPs for your facility.

Table 2. BMPs for Potential Pollutant Sources at Asphalt Paving and Roofing Materials Manufacturers and Lubricant Manufacturing Facilities

Pollutant Source	BMPs
Material storage, handling, and processing	<ul style="list-style-type: none"> <input type="checkbox"/> Cover material storage and handling areas with an awning, tarp, or roof. <input type="checkbox"/> Confine storage to designated and labeled areas outside of drainage pathways and away from surface waters <input type="checkbox"/> Practice good stockpiling practices such as: storing materials on concrete or asphalt pads; surrounding stockpiles with diversion dikes or curbs; and revegetating areas used for stockpiling in order to slow runoff. <input type="checkbox"/> Use curbing, diking, or channelization around material storage, handling and processing areas to divert run-on around areas where it can come into contact with material stored or spilled on the ground. <input type="checkbox"/> Utilize secondary containment measures such as dikes or berms around asphalt storage tanks and fuel oil tanks. <input type="checkbox"/> Use dust collection systems (i.e., baghouses) to collect airborne particles generated as a result of material handling operations or aggregate drying. <input type="checkbox"/> Promptly dispose of waste materials from dust collection systems and other operations. <input type="checkbox"/> Remove spilled material and dust from paved portions of the facility by shoveling and sweeping on a regular basis. <input type="checkbox"/> Utilize catch basins to collect potentially contaminated stormwater. <input type="checkbox"/> Develop and implement spill prevention plans to prevent contact of runoff with spills of significant materials. <input type="checkbox"/> Clean material handling equipment and vehicles to remove accumulated dust and residue on a regular basis. <input type="checkbox"/> Use a detention pond or sedimentation basin to reduce suspended solids. <input type="checkbox"/> Use an oil/water separator to reduce the discharge of oil/grease.

Table 2. BMPs for Potential Pollutant Sources at Asphalt Paving and Roofing Materials Manufacturers and Lubricant Manufacturing Facilities (continued)

Pollutant Source	BMPs
Material storage, handling, and processing (continued)	<ul style="list-style-type: none"> <input type="checkbox"/> Maintain up-to-date material inventory. <input type="checkbox"/> Maintain dry, clean floors and ground surfaces. <input type="checkbox"/> Provide transfer of PFAS containing materials and their proper collection and disposal methods in the event of a release from their container. <input type="checkbox"/> Train employees in good housekeeping, spill prevention and control, and materials management procedures.
Storage of Petroleum, synthetic-based stocks and additives	<ul style="list-style-type: none"> <input type="checkbox"/> If area is uncovered, connect sump outlet to sanitary sewer (if possible) or an oil/water separator, catch basin filter, etc. If connecting to a sanitary sewer check with the system operator to ensure that the discharge is acceptable. If implementing separator or filter technologies ensure that regular inspections and maintenance procedures are in place. <input type="checkbox"/> Develop and implement spill plans. <input type="checkbox"/> Train employees in spill prevention and control. <p>Above ground tanks</p> <ul style="list-style-type: none"> <input type="checkbox"/> Provide secondary containment, such as dikes, with a height sufficient to contain a spill (the greater of 10 percent of the total enclosed tank volume or 110 percent of the volume contained in the largest tank). <input type="checkbox"/> If containment structures have drains, ensure that the drains have valves, and that valves are maintained in the closed position. Institute protocols for checking/testing stormwater in containment areas prior to discharge. <input type="checkbox"/> Use double-walled tanks with overflow protection. <input type="checkbox"/> Keep liquid transfer nozzles/hoses in secondary containment area. <p>Portable containers/drums</p> <ul style="list-style-type: none"> <input type="checkbox"/> Keep liquid transfer nozzles/hoses in secondary containment area. <input type="checkbox"/> Store drums indoors when possible. <input type="checkbox"/> Store drums, including empty or used drums, in secondary containment with a roof or cover (including temporary cover such as a tarp that prevents contact with precipitation). <input type="checkbox"/> Provide secondary containment, such as dikes or portable containers, with a height sufficient to contain a spill (the greater of 10 percent of the total enclosed tank volume or 110 percent of the volume contained in the largest tank). <input type="checkbox"/> Clearly label drum with its contents.
Vehicle and equipment fueling	<ul style="list-style-type: none"> <input type="checkbox"/> Conduct fueling operations (including the transfer of fuel from tank trucks) on an impervious or contained pad or under a roof or canopy where possible. Covering should extend beyond spill containment pad to prevent rain from entering. <input type="checkbox"/> When fueling in uncovered area, use a concrete pad (asphalt is not chemically resistant to the fuels being handled). <input type="checkbox"/> Use drip pans where leaks or spills of fuel can occur and where making and breaking hose connections. <input type="checkbox"/> Use fueling hoses with check valves to prevent hose drainage after filling. <input type="checkbox"/> Use spill and overflow protection devices. <input type="checkbox"/> Keep spill cleanup material readily available. Clean up spills and leaks immediately. <input type="checkbox"/> Minimize/eliminate run-on into fueling areas with diversion dikes, berms, containment trenches, curbing or other equivalent measures. <input type="checkbox"/> Collect stormwater runoff and provide treatment or recycling. <input type="checkbox"/> Use dry cleanup methods for fuel area rather than hosing down the fuel area. Follow procedures for sweeping up absorbents as soon as spilled substances have been absorbed. <input type="checkbox"/> Provide curbing or posts around fuel pumps to prevent collisions from vehicles.

Table 2. BMPs for Potential Pollutant Sources at Asphalt Paving and Roofing Materials Manufacturers and Lubricant Manufacturing Facilities (continued)

Pollutant Source	BMPs
Vehicle and equipment fueling (continued)	<ul style="list-style-type: none"> <input type="checkbox"/> Discourage “topping off” of fuel tanks. <input type="checkbox"/> Regularly inspect and perform preventive maintenance on fuel storage tanks to detect potential leaks before they occur. <input type="checkbox"/> Inspect the fueling area for leaks and spills. <input type="checkbox"/> Train employees on vehicle fueling BMPs.
Vehicle and equipment maintenance	<p>Good Housekeeping</p> <ul style="list-style-type: none"> <input type="checkbox"/> Eliminate floor drains that are connected to the storm or sanitary sewer; if necessary, install a sump that is pumped regularly. Collected wastes should be properly treated or disposed of by a licensed waste hauler. <input type="checkbox"/> Do all cleaning at a centralized station so the solvents stay in one area. <input type="checkbox"/> If parts are dipped in liquid, remove them slowly to avoid spills. <input type="checkbox"/> Use drip pans, drain boards, and drying racks to direct drips back into a fluid holding tank for reuse. <input type="checkbox"/> Drain all parts of fluids prior to disposal. Oil filters can be crushed and recycled. <input type="checkbox"/> Promptly transfer used fluids to the proper container; do not leave full drip pans or other open containers around the shop. Empty and clean drip pans and containers. <input type="checkbox"/> Clean up leaks, drips, and other spills without using large amounts of water. Use absorbents for dry cleanup whenever possible. <input type="checkbox"/> Prohibit the practice of hosing down an area where the practice would result in the discharge of pollutants to a stormwater system. <input type="checkbox"/> Do not pour liquid waste into floor drains, sinks, outdoor storm drain inlets, or other storm drains or sewer connections. <input type="checkbox"/> Maintain an organized inventory of materials. <input type="checkbox"/> Eliminate or reduce the number and amount of hazardous materials and waste by substituting nonhazardous or less hazardous materials. <input type="checkbox"/> Label and track the recycling of waste material (e.g., used oil, spent solvents, batteries). <input type="checkbox"/> Store batteries and other significant materials indoors. <input type="checkbox"/> Dispose of greasy rags, oil filters, air filters, batteries, spent coolant, and degreasers in compliance with RCRA regulations. <p>Minimizing Exposure</p> <ul style="list-style-type: none"> <input type="checkbox"/> Perform all cleaning operations indoors or under covering when possible. Conduct the cleaning operations in an area with a concrete floor with no floor drainage other than to sanitary sewers or treatment facilities. <input type="checkbox"/> If operations are uncovered, perform them on concrete pad that is impervious and contained. <input type="checkbox"/> Park vehicles and equipment indoors or under a roof whenever possible and maintain proper control of oil leaks/spills. <input type="checkbox"/> Check vehicles closely for leaks and use pans to collect fluid when leaks occur.

Table 2. BMPs for Potential Pollutant Sources at Asphalt Paving and Roofing Materials Manufacturers and Lubricant Manufacturing Facilities (continued)

Pollutant Source	BMPs
Vehicle and equipment maintenance (continued)	<p>Management of Runoff</p> <ul style="list-style-type: none"> <input type="checkbox"/> Use berms, curbs, grassed swales or other diversion measures to ensure that stormwater runoff from other parts of the facility does not flow over the maintenance area. <input type="checkbox"/> Collect the stormwater runoff from the cleaning area and provide treatment or recycling. Discharge vehicle wash or rinse water to the sanitary sewer (if allowed by sewer authority), wastewater treatment, a land application site, or recycle onsite. DO NOT discharge washwater to a storm drain or to surface water. <p>Inspections and Training</p> <ul style="list-style-type: none"> <input type="checkbox"/> Inspect the maintenance area regularly to ensure BMPs are implemented. <input type="checkbox"/> Train employees on proper waste control and disposal procedures.

What if activities and materials at my facility are not exposed to precipitation?

The industrial stormwater program requires permit coverage for a number of specified types of industrial activities. However, when a facility is able to prevent the exposure of ALL relevant activities and materials to precipitation, it may be eligible to claim no exposure and qualify for a waiver from permit coverage.

If you are regulated under the industrial permitting program, you must either obtain permit coverage or submit a no exposure certification form, if available. Check with your permitting authority for additional information as not every permitting authority program provides no exposure exemptions.

Where do I get more information?

For additional information on the industrial stormwater program see www.epa.gov/npdes/stormwater/msgp.

A list of names and telephone numbers for each EPA Region or state NPDES permitting authority can be found at www.epa.gov/npdes/stormwatercontacts.
